

Add an Assignment Assignment

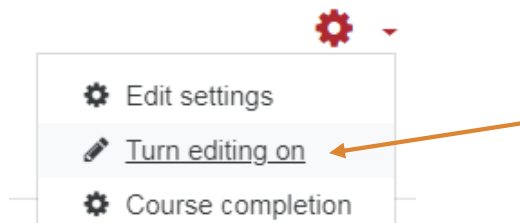

Use an assignment to have students submit work electronically by uploading a document or by working online within the Moodle course.

Contents

- How to Create an Assignment
- Assignment Settings

Create an Assignment

1. Go to the course home page.
2. Click on the **Settings** button at the top right of the page, and then select **Turn editing on** from the dropdown menu.

3. Click **Add an activity or resource** in the section where you would like to insert an assignment.
4. Click on the radio button next to Assignment and click on the **Add button**.

The "**Adding a new Assignment page**" will appear.

 **Adding a new Assignment to Module 1 - Introduction (Start Here)**

▼ **General**

Assignment name 

Description

☐ Display description on course page 

Additional files  Maximum size for new files: 500MB

 **Files**

You can drag and drop files here to add them.

Assignment Settings

5. Type an **Assignment Name**: The Name will be the title of the assignment along with the associated Moodle module. Choose a name that is specific and clear for easy student navigation. (example **M2 Assignment Essay - Public Schools, where M2 stands for Module 2**)

 **M2 Assignment Essay: Public Schools**

6. **Description.** The description is very important. The student will use the assignment description to guide them in successfully completing the assignment. The Description should have three headings:

Description

Value:

Background:

Instructions|

☐ Display description on course page ?

Value: Is this a graded assignment? Is it a required assignment? If so, how much is this assignment weighted towards (%) the final grade?

Background: Why is completing this assignment important? How does it relate to the learning outcomes?

Instructions: The instructions may be twofold:

1. Review the steps to complete the assignment. If the steps to complete an activity or assignment are sequential, use numbers to identify steps. If it is a non-sequential activity or assignment, put the steps in bullet points.
2. Review how to upload the assignment into Moodle. (If this is the first assignment in a course, you may want to include these instructions. Otherwise, you may choose to have a link to these instructions.)

7. Availability:

Availability

Allow submissions from		19	December	2018	00	00		☒ Enable
Due date		26	December	2018	00	00		☒ Enable
Cut-off date		27	December	2018	00	00		☒ Enable
Remind me to grade by		1	January	2019	00	00		☒ Enable

☒ Always show description 

Select the dates for the assignment by clicking on the **Enable** box.

Allow submissions from: If you do not enable, students will be able to start submitting right away.

Due date: This is when the assignment is due. Submissions will still be allowed after this date but will be marked as late.

Cut-off date: If set, the assignment will not accept submissions after this date without an extension.

Remind me to grade by: If set, Moodle will remind you to grade this assignment by a certain date.

8. Submission types:

Online text: Students are able to type text directly into an editor field for their submission.

File submissions: Students are able to upload file(s) as their submission.

Word limit: The Word Limit only works for Online Submissions. If selected, the student is unable to submit work beyond the selected word limit amount. See below.

[illegible]

Maximum number of uploaded files: You may have an assignment that requires more than one submission. Even if you have one document due (an essay, for example), it is recommended that you select 2 for this setting in case a student submits the wrong work and/or wishes to make corrections prior to the due date. This may save the instructor time because they won't have to revert the submitted work back to draft.

Maximum number of uploaded files

Maximum submission file: The default for the size of an uploaded file submission is set at 500MB, which is more than needed for most assignments.

Accepted file types: blocks file types that are not the ones you specify. Enter the acceptable file extensions you are willing to accept (eg. .docx, .pptx). **It is recommended you leave this blank**, as even a Word File has multiple extensions you would need to keep in mind when filling out this box. **However**, you can also click the 'Choose' button to choose a group of file extensions you would accept for this assignment:

Accepted file types

☐ All file types

☐ Archive files .7z .bdoc .cdoc .ddoc .gtar .tgz .gz .gzip .hqx .rar .sit .tar .zip
Expand

☐ Audio files .aac .aif .aiff .aifc .au .flac .m3u .mp3 .m4a .oga .ogg .ra .ram .rm .wav .wma
Expand

☐ Audio files natively supported by browsers .aac .flac .mp3 .m4a .oga .ogg .wav
Expand

☐ Audio files used on the web .aac .flac .mp3 .m4a .oga .ogg .ra .wav
Expand

☐ Document files .doc .docx .epub .gdoc .odt .ott .oth .pdf .rtf
Expand

9. Feedback types:

Feedback comments: Allows the instructor to leave feedback comments for each submission.

Feedback files: Allows the instructor to upload files with feedback when marking the assignments.

Offline grading: Allows the instructor to download and upload an Excel spreadsheet with student grades when marking assignments.

10. Submission settings:

Require that students click submit button: If enabled, students will have to click a **submit button** to declare their submission as final. If this button is not clicked, the submission remains as an editable draft for the student.

Require that students accept the submission statement: If enabled, students must click a box indicating the work is their own.

☐

This assignment is my own work, except where I have acknowledged the use of the works of other people.

Attempts reopened: Determines how attempts are reopened: **Never, Manually** (by the instructor only), **Automatically until pass** (set by the instructor in the assignment **Grade Settings** section.)

Maximum attempts: The number of attempts that a student may submit. (Default 1)

11. Group submission settings:

Students submit in groups: When set to yes, students will submit within the groups you have created in Moodle.

The following settings show if 'Students submit in groups' is set to 'Yes':

- **Require group to make submission:** if set to **Yes**, students will not be able to submit unless they are part of a group (recommended).
CAUTION: if set to 'No', all students not currently in a group will be placed in a default group, and will submit on behalf of everybody in this default group. This is not recommended for assignments where students can choose to be part of a group or submit individually. It is recommended to set this setting to **Yes** and require the student to submit to a duplicated version of this assignment where the group setting is shut off.
Alternatively, you can place students who do not want to submit in groups in their own individual groups of one.
- **Require all group members submit:** if this setting is set to 'Yes', then one student can submit on behalf of the entire group, but the rest of the group has to click the **Submit** button (each clicks individually) to confirm the submission.
- **Grouping for student groups:** if you have groupings in your Moodle course, you can select which grouping to use.

12. **Notifications:** Choose notifications about submitted assignments for students or instructors.

13. Grade settings:

Grade: Specify the maximum grade or scale to be applied to the assignment. If you will not be giving a grade for this assignment, choose "No grade." You can also use a scale (eg. Fail/Pass).

Grading method: Select a grading method, such as 'Simple Direct Grading' or 'Rubric':

Simple direct grading: Enter a grade or scale item.

- **Rubric:** Advanced grading used for criteria-based assessment. (See Assignments - Rubrics)
- **Marking guide:** Advanced grading. A teacher enters a comment per criterion and a mark. (See Assignments- Marking guides)

14. **Grade category:** Select the required Grade category to add this assignment.

15. **Blind marking:** Hide the student information from the marker while they are marking the assignment (Note that this isn't 'true' blind marking, as it can be determined from the logs who submitted an assignment at a certain time).
16. **Use marking workflow:** If enabled, marks will go through a series of workflow stages before being released to students. This allows for multiple rounds of marking and allows marks to be released to all students at the same time. Great if there are several people involved in marking assignments.
17. **Use marking allocation:** If enabled together with marking workflow, markers can be allocated to particular students.
18. **Common Module Settings:** Use this section to hide the assignment or assign groups.
19. **Restrict access:** Allows you to not have the assignment open until certain criteria are met.

Add restriction...

Activity completion	Require students to complete (or not complete) another activity.
Date	Prevent access until (or from) a specified date and time.
Grade	Require students to achieve a specified grade.
Group	Allow only students who belong to a specified group, or all groups.
User profile	Control access based on fields within the student's profile.
Restriction set	Add a set of nested restrictions to apply complex logic.
Cancel	

20. Click on the **Save and return to course button** or the **Save and display** button.
