

Download all Assignment Submitted Assignment

Once students submit their work electronically, instructors may download all the students' uploaded documents at once in a zipped folder. Doing so saves the instructor time.

Contents

- Steps to Download all files submitted by students

Download all Files Submitted by Students

- Go to the course home page.
- Click on the **Assignment activity** on the home page.
- Click **View all submissions**

Due date	Friday, 4 January 2019, 12:00 AM
Time remaining	8 hours 29 mins

[View all submissions](#)
[Grade](#)

- Choose **Download all submissions** from Grading action. Your zip folder containing submissions will be automatically downloaded to your Downloads folder (or other default download area you may have set).

Assignments- Download all Assignments Submitted

The files will be saved as a zip file and Moodle will create a new folder name using the student's name.

The zip file name will consist of "Course name - Assignment name - ID#" (ID number is Moodle-specific and you don't need to know it).

The file will be contained within a folder called, "Student name_ID#_assignsubmission_file_".

5. Right-click the zip file you just downloaded, and click on **Extract all...**

Note: If you intend to upload the feedback files later, **do not change** the student folder names. You have to keep the names exactly the same.
