

User Overrides

Students may need accommodations to meet their learning needs or occasionally events in students' lives require instructors to modify assignment parameters. When you need to modify an assignment for students, you may use user overrides so a student(s) may have extra time or an alternate date to complete the assignment.

Contents

- How to set user overrides
 - Step One: Select assignment
 - Step Two: Locate the User Override
 - Step Three: Adjust the Student User Override

How to set User Overrides for a student.

The following instructions should be used to assist students when students are in need of accommodations.

Step One: Select the assignment that requires a user override.

1. Log into Moodle.
2. Select the course that has an assignment that requires a user override.
3. Click on the assignment the student needs to take.

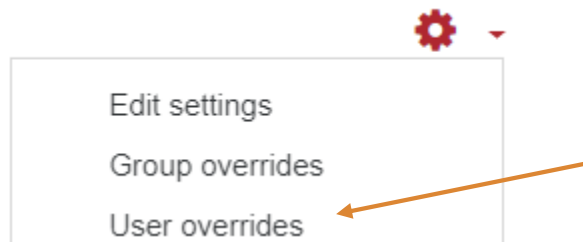

Hint: look for the 'page and hand' icon!

4. You will see the Assignment Instructions and Grading summary as an instructor.

Step 2: Locate User overrides.

After you have clicked on the assignment, click on the **Settings button** (top right). In computer lingo, we say the **Settings button** is intuitive; it changes depending upon where you are in Moodle. When you are in an assignment, items listed in this menu

pertain to the assignment. Select **User Overrides**. [Note: If you go into the Edit settings you are adjusting the assignment settings for the entire class.]

Step 3: Adjust Student User Overrides:

1. Add User Override

Once you have selected **User Overrides**, the following will appear on your screen. Click on **Add User Override**.

M1: Group Presentation

The following will appear:

▼ Override

Override user ! No selection

Search Search box for students

Allow submissions from 4 ▾ January ▾ 2019 ▾ Enable

Due date 11 ▾ January ▾ 2019 ▾ 00 ▾ 00 ▾ Enable

Cut-off date 4 ▾ January ▾ 2019 ▾ 09 ▾ 44 ▾ Enable

Revert to assignment defaults

Save Save and enter another override Cancel

Assignment Dates

2. Locate the student's name in the User Override area

Find the student from the list or do a search. See below three different instances of student searches using a student's first name, last name or parts of their name. Ensure the sequence of letters are correct.

nq ▼

NQC Test1, nqctest1@gmail.com

NQC Test2, nqctest2@gmail.com

You will not have to type out the entire student name.

test1 ▼

NQC Test1, nqctest1@gmail.com

You can use the first name or the last name or parts of the name... but make sure you have the correct letter sequence.

est1 ▼

NQC Test1, nqctest1@gmail.com

3. Select the student.

NQC Test2, nqctest2@gmail.com

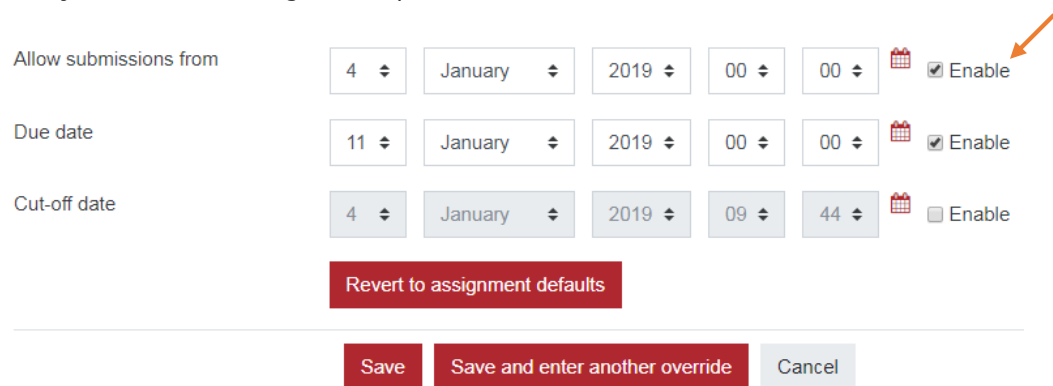

4. Adjusting the Assignment Settings for a Student

There are two predominant issues you typically address through User Overrides.

You may need to:

- Open the assignment because the student is writing the assignment at a different time.
- Adjust the length of time a student has to complete the assignment.

How to open the assignment for students. If the dates and time are not in the range as set for the remainder of the class, click on the **Enable** button on the far right and adjust the dates using the drop down button.

Allow submissions from: 4 January 2019 00:00 ☒ Enable

Due date: 11 January 2019 00:00 ☒ Enable

Cut-off date: 4 January 2019 09:44 ☐ Enable

[Revert to assignment defaults](#)

[Save](#) [Save and enter another override](#) [Cancel](#)

Remember you are adjusting the assignment for the selected student.

If you have chosen the wrong student or want to revert back to the original parameters, you may **Revert to assignment defaults**.

6. Double check the Overrides you have created for student(s).

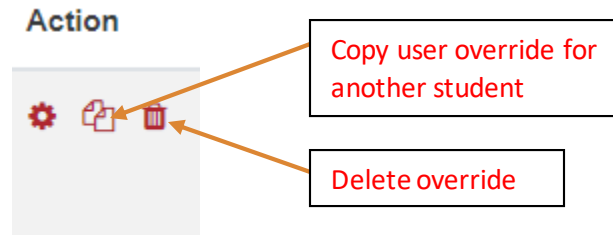

Once **Save** is selected, you are shown the revisions you have made.

If you made a mistake, remember you may return to the **User override window**. Click on the **gear** under Action across from the student's name.

User	Overrides	Action
NQC Test2	Open Saturday, 5 January 2019, 12:00 AM	
	Due date Saturday, 12 January 2019, 12:00 AM
