

Download all Assignment Submitted

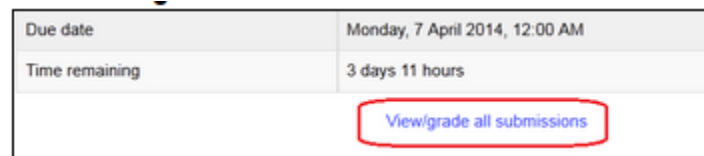

Once students submit their work electronically, instructors may download all the students' uploaded documents at once in a zipped folder. Doing so saves the instructor time.

Contents

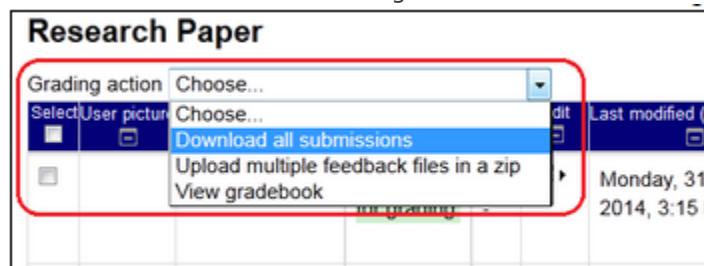

- Steps to Download all files submitted by students

Download all Files Submitted by Students

- Go to the course home page.
- Click on the **Assignment activity** on the home page.
- Click **View/grade all submissions**.

- Choose **Download all submissions** from Grading action.

- Select the place (a folder or desktop, etc.) where you want to save submissions and click on the **OK** or **Save** button.

The files will be saved as a zip file and Moodle will create a new file name using the student's name.

The zip file name will consist of "Course name - Assignment name - ID #".

The file name will consist of "Student name_ID#_assignsubmission_file_Assignment name".

Note: If you intend to upload the feedback files later, do not change the file names. **You have to keep the names exactly the same** but you need to save those files as a different file type (PDF).
