

Metacourse your Moodle courses

If you are managing several sections of students taking a course together, it is convenient to combine these two or more separate Moodle instances. When you merge courses, enrollment from the two 'child' courses transfer to a 'parent' course. You will need to add content to the 'Parent Course'.

The combined course has XL in the title and the numbers and letters of the separate courses.

1. Go to theg.norquest.ca
2. Click on the **Self Serve** tab at the top.
3. Go to the **Service Desk Request** box, and select **Create Metacourse**. This will take you to the Sharepoint.

Service Desk Requests

Visit our [IT Service Portal](#) for information on how to request a service, report an incident, ask a question via chat, or browse our knowledge base for frequently asked questions and how to articles!

Courses to Place in the Metacourse

Add some courses in the section above to place in your Metacourse.

Submit Cancel

6. Select **Add** on the right hand side for each course you want to add. (Wait a few seconds between each 'add'.)
7. Check the 'Courses to Place in the Metacourse' box at the bottom to make sure that everything within is correct, and then click the **Submit** button.
8. A confirmation email will be sent from Service Desk when your metacourse is done.
