

Moodle Roles and Moodle Student-Course Life Cycle

It is important to differentiate roles in Moodle. The students' ability to interact with a Moodle course is based on the **Student** Role and **Student Read Only** roles assigned to them and the **Course Life Cycle**.

Roles in Moodle

Moodle enrollments are created in People Soft. Assigning roles in Moodle is part of the enrollment process. What you may do in Moodle, depends on your Moodle role. Your Program Chair will assign roles (Teacher, Non-editing Teacher and Chair) to faculty in Moodle depending upon the work assigned. Students' enrollment is an automated process handled through the Office of the Registrar (OR).

Chair: People are assigned the **Chair** role, if they will be required to do administrative work in Moodle. Typically, the Chair role is defined to a specific department or section of Moodle. Chairs may view courses within this course without being attached to the course. Chairs may copy course content, and create new courses. Chairs may extend student enrollment manually.

Teacher: 'Teachers' manage courses. Teachers may add content and blocks to the course page.

Non-editing Teacher: In this role, an instructor may assist with marking, but are not able to make edits to course content. In courses with multiple faculty attached, using this role for instructors who are not the course lead should be considered. This prevents errors in gradebooks, and assignment of course content and the alignment to course outcomes to one faculty person.

Student: A student may access and participate in the course.

Student view only: A student may access the course and view content; however, these students are not able to interact with content. Student will not be able to upload assignments, complete quizzes, etc...

FAQs about Student Read Only Role:

1. [How long may NorQuest students complete Moodle quizzes and contribute to forums past the course end date?](#)
2. [What may a student with a **Student read only** role do in a Moodle course?](#)
3. [If a student is leaving NorQuest College, how long do they have access to Moodle?](#)
4. [Are students able to view past BBUltra recordings in a **Student read only** role?](#)
5. [Are they able to participate in current BBUltra sessions, if I need to meet with a student in a Student Read Only Role?](#)

1. How long may NorQuest students complete Moodle quizzes and contribute to forums past the course end date?

Student may still contribute to open Moodle course activities for 32 days past the class end date. If a student needs an extension, the student's enrollment may be extended, given Chair and instructor approval. See tip sheet **Extending Student's Enrollment**.

2. What may a student with a **Student read only** role do in a Moodle course?

After the 32 days, for a period of 12 months, continuing NorQuest students can view embedded slides, preview quizzes, click on links (including links to Blackboard recordings), read forum posts, etc., but they cannot make input (i.e., submit quizzes, post to forums, etc.).

3. If a student is leaving NorQuest College, how long do they have access to Moodle?

Students who leave NorQuest will have access to Moodle only for 32 days and as long as it takes the Office of the Registrar to process their change in status.

4. Are students able to view past BBUltra recordings in a **Student read only** role?

Students are still able to access recordings and attend BBUltra sessions in a **Student read only** role.

5. Are they able to participate in current BBUltra sessions, if I need to meet with a student in a Student Read Only Role?

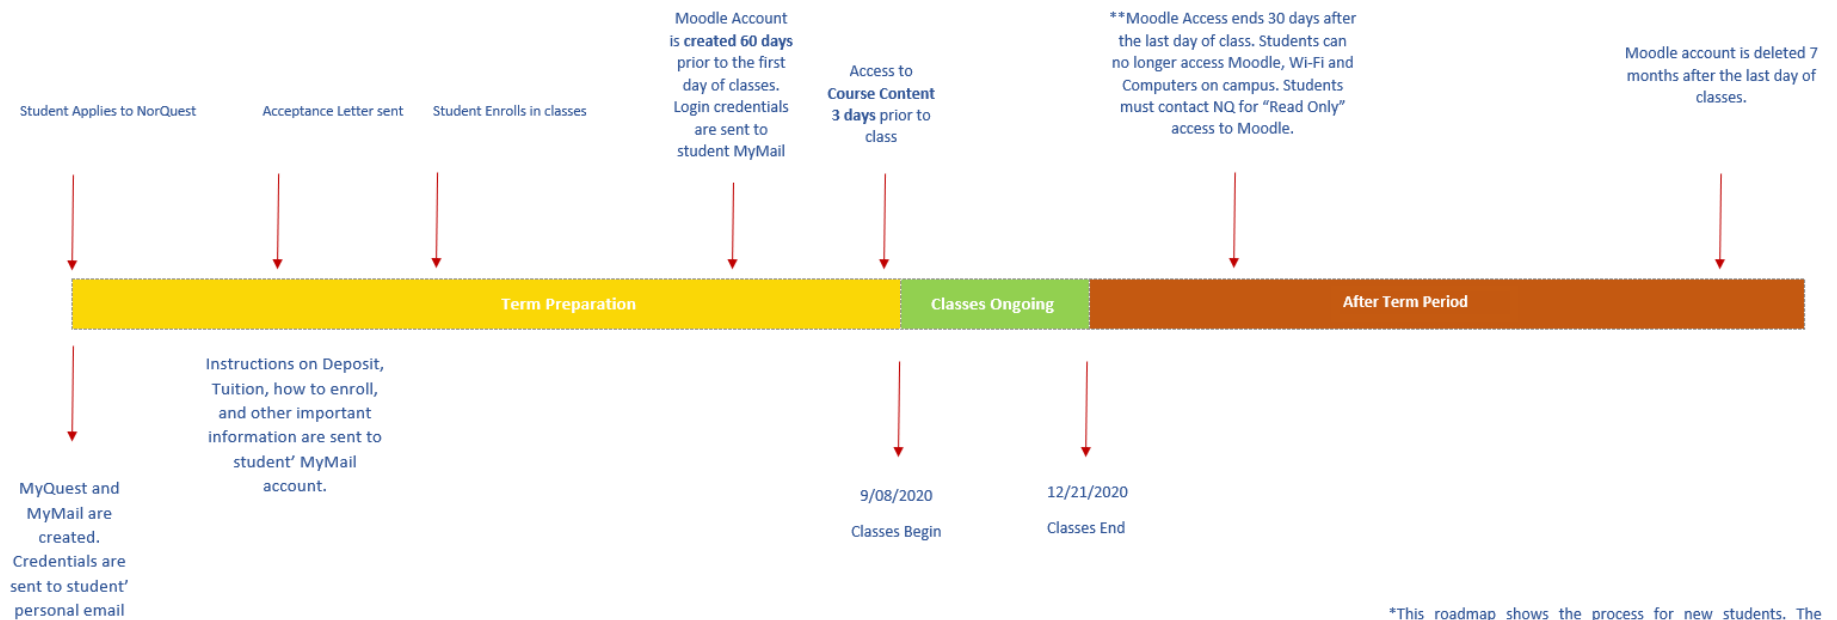

If you do not want students to continue to access the recordings, you may hide this activity on the course front page.

For further questions about the roles in Moodle, please contact moodle@norquest.ca

Student Account Life Cycle Timeline

Diagram by Computer Commons

*This roadmap shows the process for new students. The timeline may vary depending on the program and enrollment date.

**If a student is enrolled for the next term that is within 140 days of the last class end date, then the student Active Directory account should not be deleted.
