

People Soft and Moodle

The Connection: Peoplesoft (PS) Student and Moodle are connected in two ways: Enrollment and Courses. When there are changes/additions in PS, it will be reflected in Moodle. The changes and additions will show immediately on PS, however, the changes will be reflected overnight on Moodle.

Helpful Information: When searching for courses in People Soft and Moodle it is helpful to know the course number.

[Dashboard](#) / [Courses](#) / [Business, Environment, and Tec](#) / [BUSD-1001-A02-XXXXXXXXXX-2020 Fall](#)

The above image shows the path for a Moodle course. The blocked out number indicates the **Class Nbr**, Class Number, of the specific class in PS Student. You can use number to search for courses in both Moodle and People Soft.

Content:

This tip sheet reviews some common issues with People Soft Student/Moodle:

1. [Class appears in PS, but not in Moodle](#)
2. [Class shows in Moodle, but instructor doesn't see it](#)
3. [An instructor needs immediate access to a course \(same day\).](#)
4. [Class shows in Moodle, but student\(s\) do not see it:](#)

[Check People Soft](#)

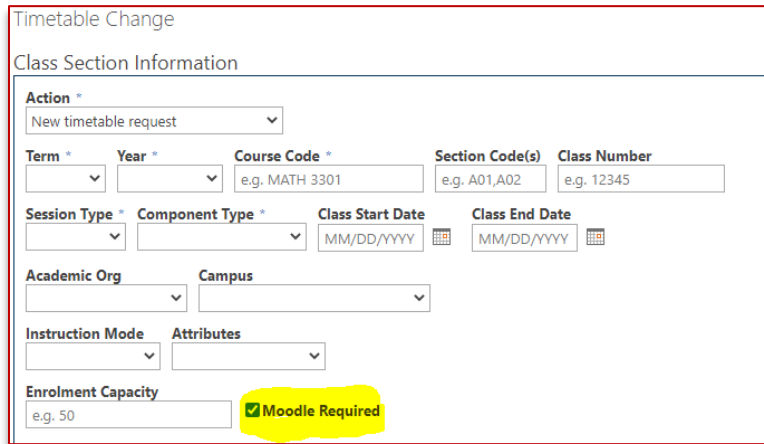

[Check Moodle](#)

Troubleshooting

1. Class appears in PS, but not in Moodle:

The Learning Management System (LMS) Moodle may not be activated.

If the section was created using the OR Timetable Change, it is possible the **Moodle Required** box was not selected. See below.

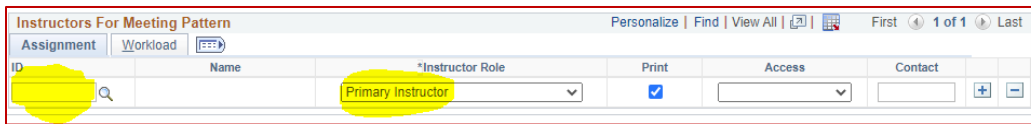

Check to see if the LMS was selected in PS by following this path: **PS Student > Main Menu > Curriculum Management > Schedule of Classes > Maintain Schedule of Classes** > Enter the applicable information, select class.

- Select the **LMS Data** tab, if LMS box is populated, that indicates there is a People Soft and Moodle connection.
- If you need to check the LMS box, remember it may take overnight for changes to be reflected in Moodle.

2. Class shows in Moodle, but instructor doesn't see it:

Ensure the instructor is attached to the course in PS. Follow the path of: **PS Student > Main Menu > Curriculum Management > Schedule of Classes > Schedule Class Meetings** > Enter the applicable information, select class.

- Check to see if a **Primary Instructor** is entered. See below:

ID	Name	*Instructor Role	Print	Access	Contact
		Primary Instructor	☒		

If you need to add the **Primary Instructor**, remember it will take overnight to be reflected in Moodle.

3. An instructor needs immediate access to a course (same day)

Occasionally, an instructor needs immediate access to a course. For example, an instructor who is taking over or adding to their teaching assignment, may need immediate access to teach. You can “attach” instructors in Moodle, however, only attach instructors that are approved by the department and make sure you also attach this instructor to the course through People Soft. (People Soft enrollment is still required. Instructors will need access to People Soft to see student accommodations and to enter final course marks.

Instructions

1. Log into Moodle
2. Find class
- *3. Select **Participants** in the Navigation Panel on the left
4. Select **Enrol users**
5. Search for instructor and assign applicable role (**Teacher**)
6. Select **More**
7. Select an end date for enrollment.

*NOTE: students will show up in this search. Make sure the instructor’s email is @norquest.ca and **not** @mynorquest.ca. NQC employees may have been a student before being an employee and may have 2 accounts. Be sure you select the correct one.

Class shows in Moodle, but student(s) do not see it:

Check People Soft:

Check “Participants” in Moodle. If it is empty, students have not been enrolled in PS.

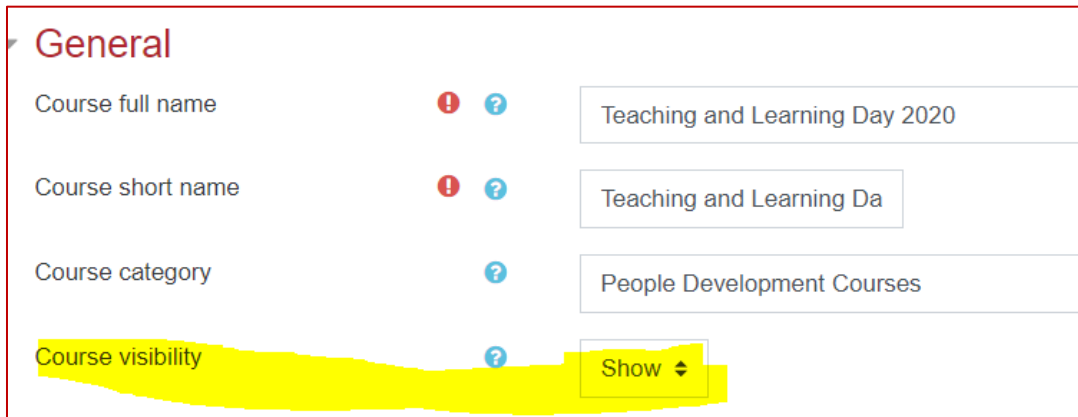

To check if students are enrolled follow the path of: **PS Student > Main Menu > Curriculum Management > Class Roster** > Enter the applicable information, select class. This will show the enrolled students.

- NOTE: If there is specific student(s) you're searching for, you can search by student ID. Use Ctrl + F and enter the ID.

Check Moodle:

Occasionally, a course is closed by mistake. Login to Moodle > go to the course > Select **Edit settings** in the top right gear of the course.

Under **General > Course visibility > Show**
