

Mic/Camera Troubleshooting in Chrome

If you are having issues with your audio or video, please check your session and browser settings.

In your session, click the **purple tab** (bottom right hand corner) to open the Collaborate Panel. Select **'My Settings'**.

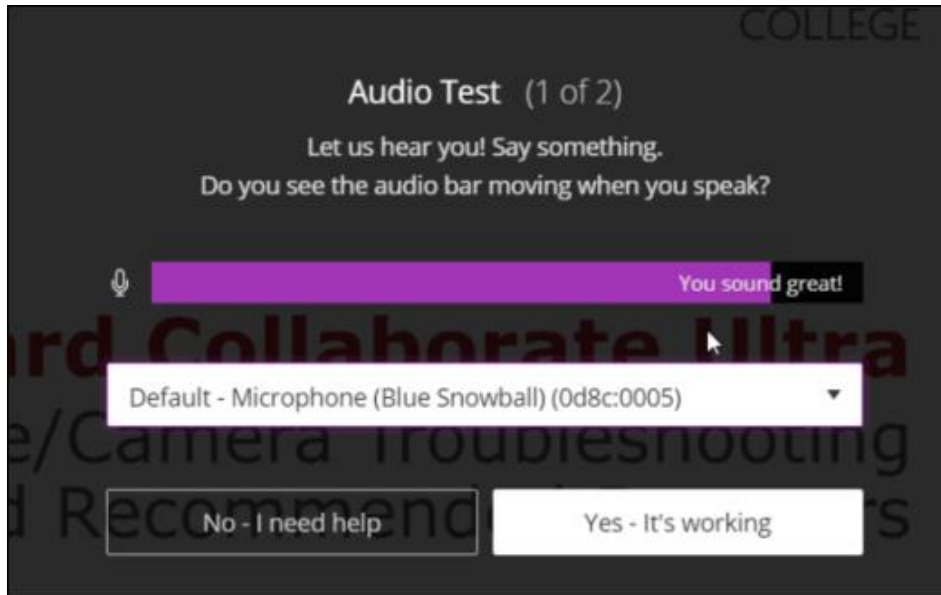

Locate **'Set up your camera and microphone'** under **'Audio and Video Settings'**.

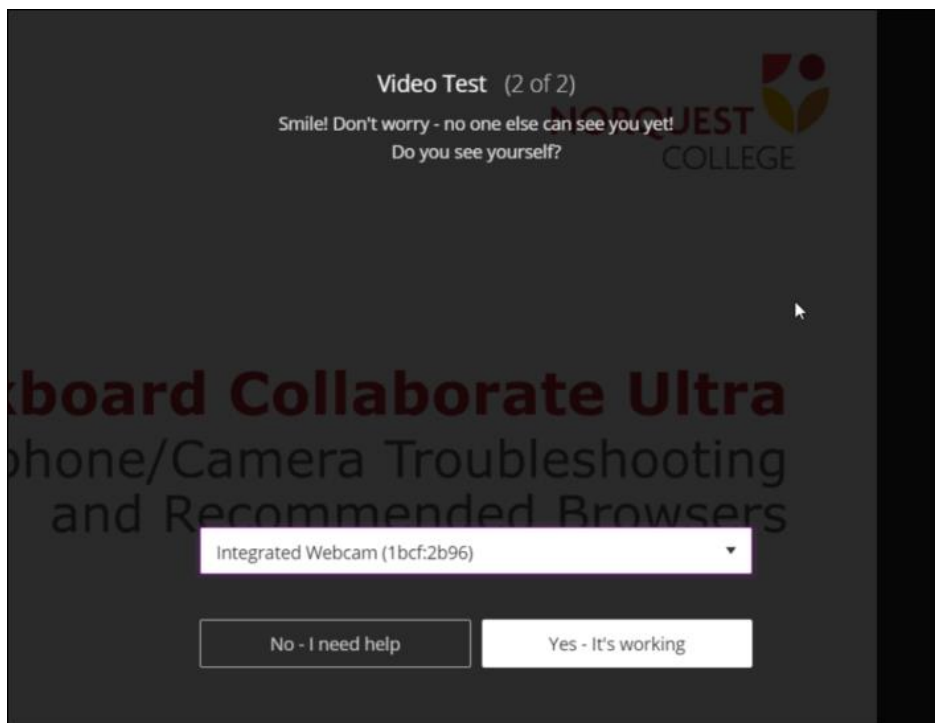

Microphone/Camera and Browser Settings in Google Chrome

Complete the audio test. Say a few words. If your microphone is working, you should see the purple bar moving. Select **'Yes, it's working'**.

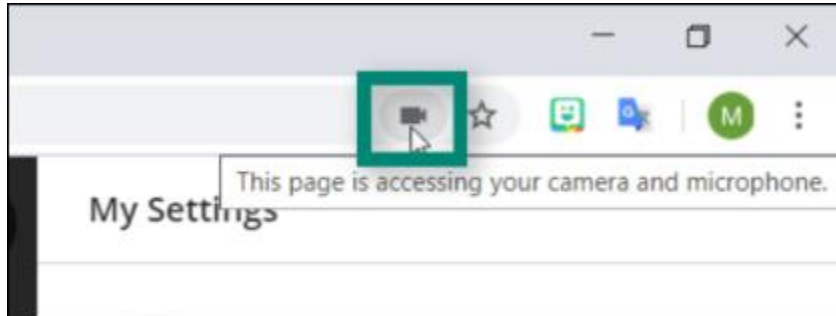

Note: If you are using an external microphone, it must be plugged in prior to joining the session. You can select your microphone by using the drop down menu.

Next, check your camera settings. You will first see a video preview. Click **'Yes, it's working'** when you are finished with settings.

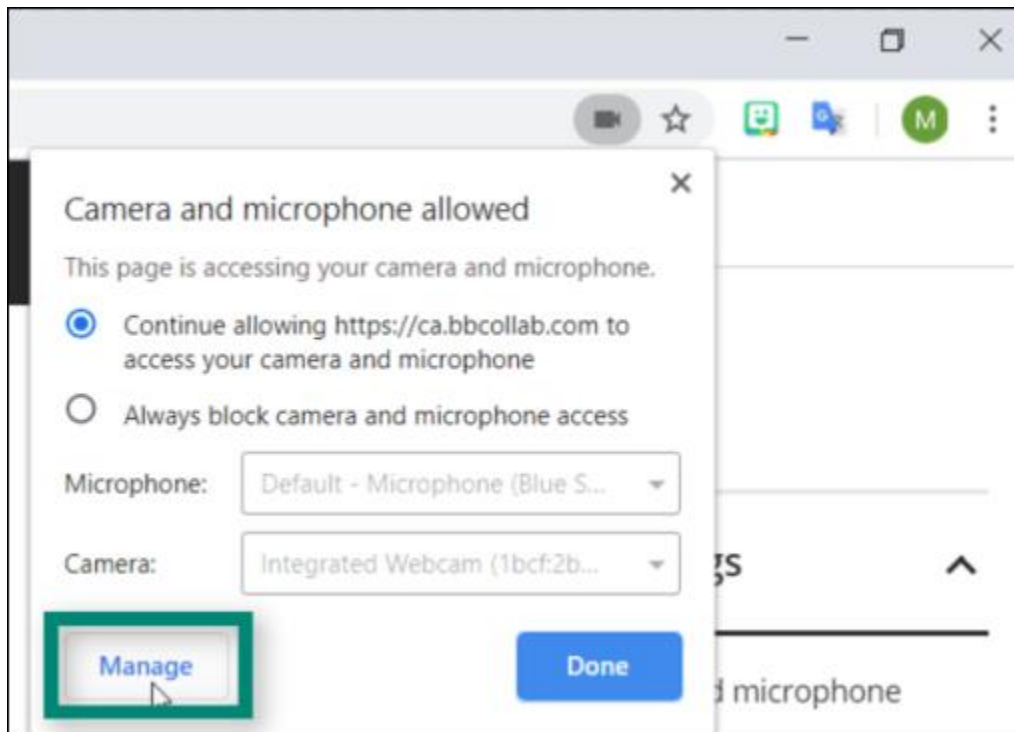

Microphone/Camera and Browser Settings in Google Chrome

If you are still having trouble sharing your camera or microphone, locate the **camera icon** near the top right of your screen.

Here you can access Google Chrome's site settings. Click **'Manage'**.

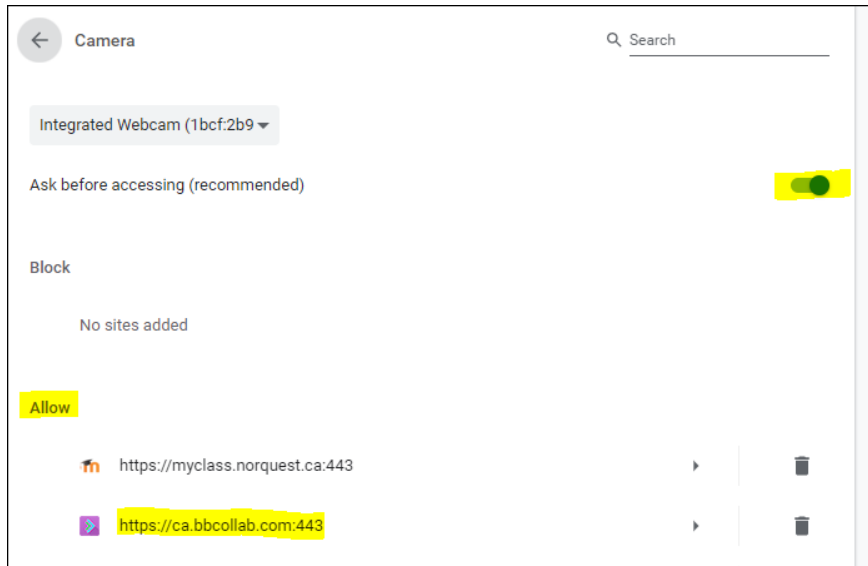

Make sure you set permissions to allow both your microphone and camera.

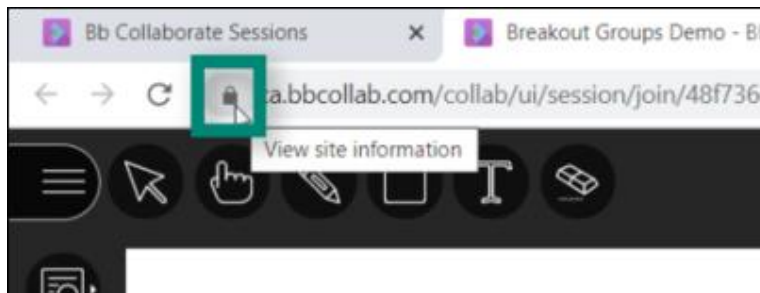

Microphone/Camera and Browser Settings in Google Chrome

Check to see that **'Ask before accessing (recommended)'** is toggled on for both camera and microphone settings.

You can also check your browser's setting by clicking the **lock icon** near the URL.

Make sure you have allowed permissions by selecting **'Allow'** under Camera and Microphone.
