

Course Cards

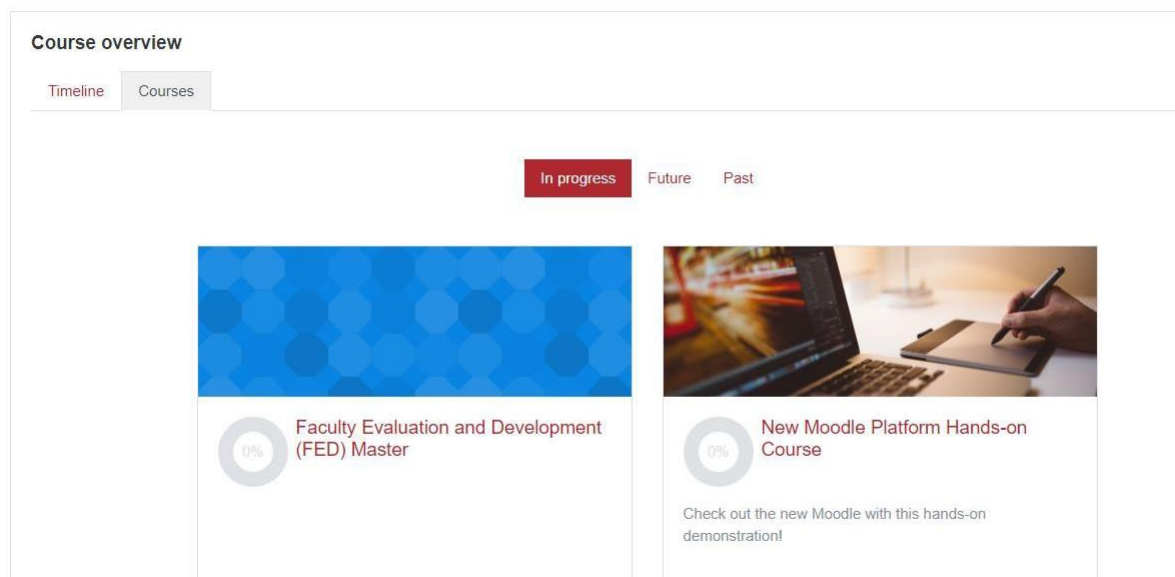

Course cards allow students to see their course visually on the Dashboard. This added feature follows universal design principles.

- [Creating a Course Card](#)

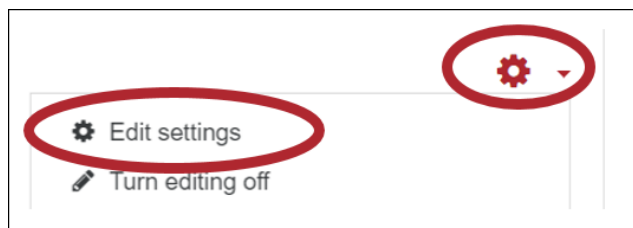

The Dashboard Set-up

The default Dashboard has tabs for **Timeline** (assignments and quizzes) and **Courses**. Course are further organized in to **In Progress**, **Future** and **Past** courses. If you do not create a course card (visual image of the course), a coloured course card will represent your course. (See below the blue course card.) You can add pictures to represent your course as well.

Creating a Course Card

1. Go to your settings for the course by clicking on the dropdown drop down menu and selecting '**Edit settings**'.

2. Scroll to the Course Summary Files. Drop in your image (gif, jpg, png) saved on your computer. **NOTE: Images should be public domain or one of your own. Please do not include students in your own pictures.**
