

Backing Up a Copy of Your Course

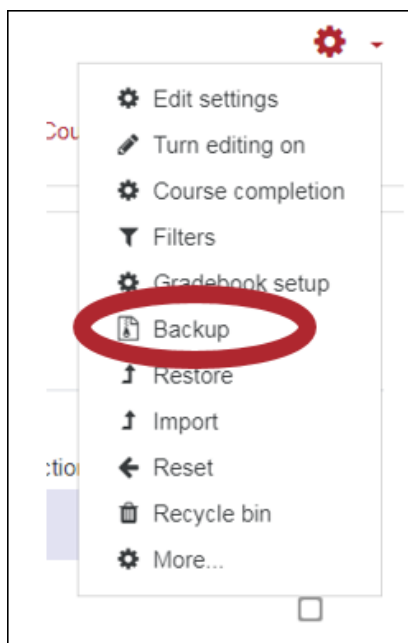

The course cards are a new feature of Moodle, but you may prefer the old listed layout for various reasons – for example, you are attached to a lot of courses. This “old” layout also allows you to hide courses if you are not currently using them.

Contents

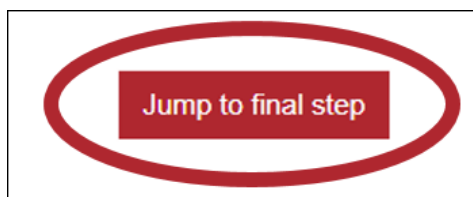

- Backing up (copying) from a previous course

Backing up (copying) from a previous course

1. Go to the course that you want to copy things from.
2. Once you are in the course that you want to take items **from**, click on the '**Settings button**' and select '**Backup**' from the dropdown menu.

3. Click on '**Jump to Final Step**'.

- When you see a screen like this, look at the highest row in the 'User private back up area' or in the 'Course backup area'. Click on '**download**'.

Import a backup file

Files ! Choose a file...

You can drag and drop files here to add them.

Restore

There are required fields in this form marked !.

Course backup area ?

Filename	Time	Size	Download	Restore
backup-moodle2-course-23-example_course_101-20190114-1335.mbz	Monday, 14 January 2019, 1:35 PM	2.5 MB	Download	Restore

Manage backup files

User private backup area ?

Filename	Time	Size	Download	Restore
----------	------	------	----------	---------

- The backup copy will **pop up on the lower left side of your screen**. If you can't find it there, you can find it in your 'downloads' folder on 'My Computer'. It will have a long name like, "backup-moodle2-activity....,"
- Right click on the icon for the backup file and choose "save" then save the copy to the place on your computer where you want to keep it. **NOTE: your computer can't open the file but it can store your course for when you are ready to upload it into a new Moodle course.**
