Backup Your Course

The backup function in Moodle allows you to save an offline copy of your course to your computer. This offline copy is not readable by your computer and needs to be restored into Moodle to function properly. This tip sheet will walk you through the process of backing up your course and restoring it.

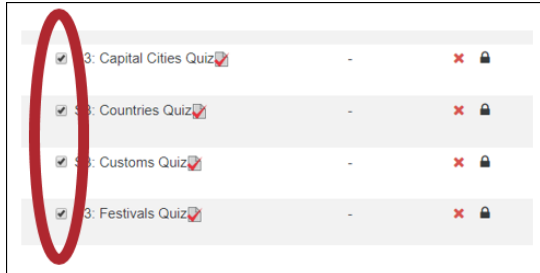

1. On the front page of your course, click on the **Settings button** (gear) and then click on **'Backup'**:

2. **Uncheck** the 'Include enrolled users' button if it isn't already checked. You only want to backup the content of the course, not the users.

Copying Content into another Course

3. Click on **'Jump to the final step'** if you want to make a backup of the entire course. **If you want to backup only part of the course**, click on **'Next'** and follow the prompts to select the content you would like to backup by checking and unchecking the checkboxes next to the items. If you did this, click on **'Perform backup'** after you have confirmed which content you would like to backup.

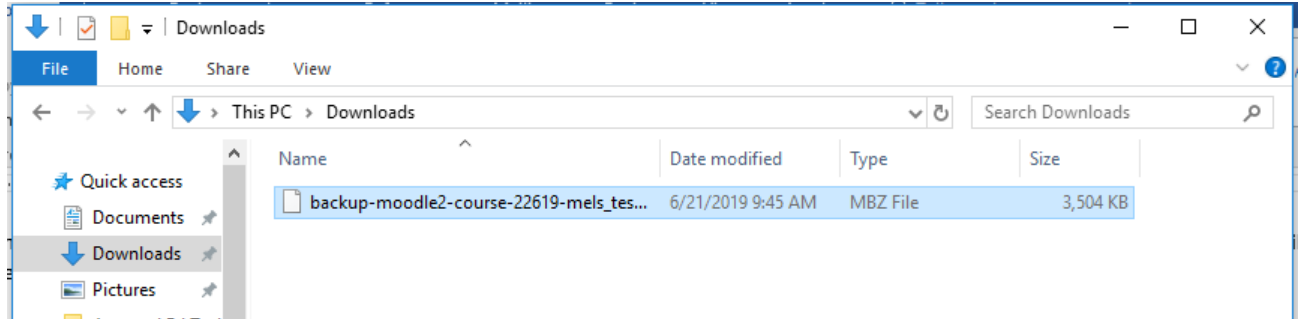

4. The next screen shows you your available downloads. Under 'User private backup area', click on the 'Download' link next to the file you would like to download. Check the date and name of the file (see underlined below) to make sure you are downloading the right file:

User private backup area?				
Filename	Time	Size	Download	Restore
backup-moodle2-course-22619-mels_testing_course- <u>20190621-0943-nu.mbz</u>	Friday, 21 June 2019, 9:43 AM	3.4MB	Download	Restore
backup-moodle2-course-22619-mels_testing_course- <u>20190621-0941-nu.mbz</u>	Friday, 21 June 2019, 9:41 AM	3.4MB	Download	Restore
backup-moodle2-course-22313-foip- <u>20190522-1548-nu.mbz</u>	Wednesday, 22 May 2019, 3:48 PM	483.2MB	Download	Restore

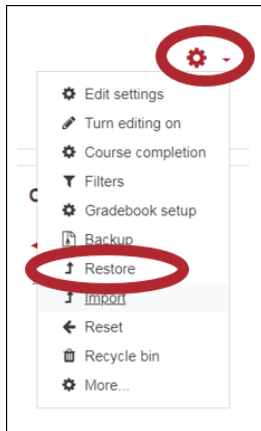

5. Your course will now start downloading. You will be able to find the file in your Downloads folder or wherever you have allowed your computer to store downloads. Depending on the size of your course, this download may take a few minutes to complete:

Copying Content into another Course

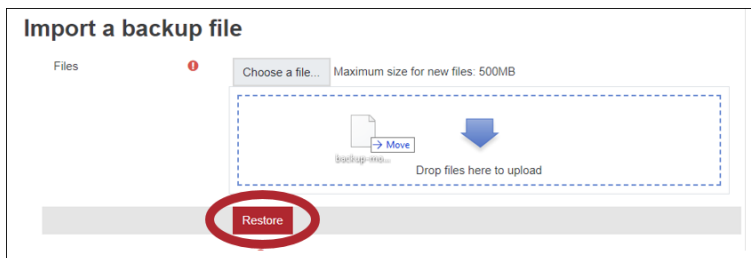

Restore Your Course

1. Click the **Settings** button in the **course you want to restore into**, and click on 'Restore':

2. **Drag and drop** your course file into the box with the blue arrow, and then click on '**Restore**'.

Alternatively, if you still have the file in your User private backup area, you can click on the '**Restore**' link next to the file you would like to use to restore:

User private backup area

Filename	Time	Size	Download	Restore
backup-moodle2-course-22619-mels_testing_course-20190621-0943-nu.mbz	Friday, 21 June 2019, 9:43 AM	3.4MB	Download	Restore
backup-moodle2-course-22619-mels_testing_course-20190621-0941-nu.mbz	Friday, 21 June 2019, 9:41 AM	3.4MB	Download	Restore

3. The next screen will show you what is being backed up. Click on the 'Continue' button at the bottom of the page.

4. The screen after will show you various options for restoring – Restoring as a new course, restoring into the course you are currently in, or restoring into an existing course. Select an option in the **'Restore into this course'** section. You can choose to merge the backup into the course, meaning that activities and resources that already exist in the course will remain, OR you can choose to delete the content in the course and restore from the backup. Click 'Continue' in this section.

Restore into this course

Merge the backup course into this course ☒

Delete the contents of this course and then restore ☐

Continue

5. The next two screens are further confirmation of what you want to backup. On the first of these screens, keep the information at the top of the page intact (eg. 'Overwrite course configuration') **EXCEPT if you chose to delete the contents of this course and then restore. If you do this, you MUST set 'Keep current roles and enrolments' to YES to maintain all current enrollment in this course!** You can check and uncheck boxes here if you do not want to include certain things, otherwise click 'Next' on both of these screens.

Restore settings

Include enrolled users	☒	
Include enrolment methods	No	
Include user role assignments	☒	
☒ Include activities and resources		
☒ Include blocks		
☒ Include filters		
☒ S3: Capital Cities Quiz	-	No
☒ S3: Countries Quiz	-	No
☒ S3: Customs Quiz	-	No
☒ S3: Festivals Quiz	-	No

6. The next screen is a final confirmation of what is being brought over. If everything is okay, click on **'Perform restore'**. If you need to change something, click on **'Previous'**.
