

Extending student enrollment in Moodle

People Soft controls Moodle student enrollment. Thirty-two days after the end of a course, the **Student role** changes to **Student Read Only**. The **Student Read Only** role allows students to view course materials, but does not allow the student to access and interact with course activities, including assessments. If students have initiated a grade dispute, or other extra ordinary circumstances, people with the Moodle Chair role may follow these steps to extend students' access to a Moodle course. **Note:** If this is the student's last term at NorQuest College, the student will no longer be able to use their Moodle login after the 32-day period. You will need to get the student to contact Computer Commons to extend their Moodle access beyond their active directory. computercommons@norquest.ca

Steps

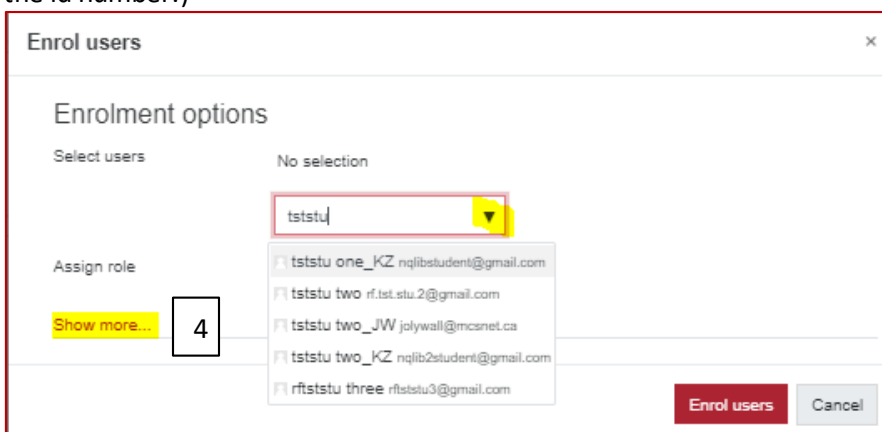

1. Go to the **Participants** in the Navigation panel.

2. Select **Enroll users** top right.

3. Search for the student and select their name from the dropdown menu. (Check the id number.)

4. Select **Show more**.

Enrol users

Enrolment options

Select users: ✖ tststu two_JW jolywall@mcnet.ca

Assign role: tststu

Assign role: Student

5 ☒ Recover user's old grades if possible !

Default enrolment duration: 180 days **6**

Starting from: **7** Course start (30/04/19)

[Show less...](#)

8 Enrol users Cancel

5. Select **Recover user's old grades if possible**.
6. Give a **Default enrollment duration**. (Remember this is time from the course start date. To add an extra 4 weeks to a 4 month course with an additional 4 weeks enrollment use 180 days.)
7. **Starting from:** Choose **Course Start**.
8. **Enrol users**.

Please contact moodle@norquest.ca for further assistance.
