

Overview

This tip sheet does not explore all the facets of the robust Moodle Gradebook. Rather, it focusses on how you are able to create and view the Moodle Gradebook panes that are important for most faculty. If you have special assessment/gradebook considerations, review the Gradebook Consolidated tip sheet and/or contact moodle@norquest.ca for further assistance.

Your Moodle Gradebook should be set-up in your course for students at the beginning of a term. Students knowing their real time average is important. Ensuring your Moodle Gradebook is correct in your course Master helps with this process.

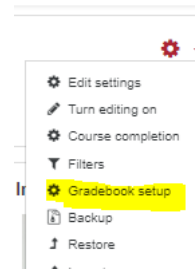

Your Moodle Gradebook should use the same language and weightings as your course outline. If one assignment is broken into many parts, create an assignment category with the name you have given the assignment in your course outline so students are able to understand how they are being evaluated with ease.

Accessing Gradebook

Access the Gradebook under the course gear: Gradebook setup. Students view their Gradebook in the Navigation pane. If you use the Navigation pane, you are directed to the Grader Report. We encourage you to ignore the Grader Report in this condensed review of the Moodle Gradebook.

Gradebook Set-up

This is the first page in Gradebook you view. Start here to set your Gradebook to match your Course Outline.

Course Settings

1. At the top of the Gradebook setup, you will see your course name. (See previous pic.) Select the drop down **Edit** menu by your course name.
2. Make sure the aggregation is set to **Weighted means of grades**. (See pic below.)
3. Select **Show more**.
4. Select **Exclude Empty Grades**. (Students will not be penalized for work not yet complete. This provides students with a real time average. Make sure work not completed by student is given a zero.)
5. **Save changes**.

All graded activities entered on your Moodle course page automatically show up in the Moodle gradebook. Your gradebook set-up may be simple; you enter the weightings for each activity and select **Save**.

Activity	Grade
M1 Assignment: Introduce Yourself to Your Teacher	40
M2 Group Assignment: Add title here	40
M2 Reflection: Add title here	40
Test Quiz	0
M6 Quiz: Add title here	20
Course total	Weighted mean of grades.

Creating Grade Categories

Occasionally, you may need to create categories for graded items. For instance, you may need a category for:

- an assignment broken into component parts.
- course forums or in-class activities, etc.
- practice quizzes and activities in your course with a weighting of 0. (Students and you are able to track involvement and success in these activities but not included in the final grade.)

In class activities	category	20.0	-
☐ W2 Course Expectations - of your instructor or your colleagues and/or poster			2.00
☐ W1 - Reading stories aloud and exploring story baskets			2.00
☐ W3 - Connecting story sharing with development in infants/toddlers and critiquing children's books			2.00
☒ W4 - Quiz - Literacy for Infants & Toddlers (part of In-Class Participation grade)			6.00
☐ W5 - Oral Storytelling centres in play lab			2.00
☐ W6 - Storytelling/Early Literacy Presentation at Woodcroft Library			4.00
☐ W7 - Guest Speaker from Centre for Family Literacy			4.00
☐ W8 - Environmental Print Quiz			2.00
☐ W9 - 4 Ways that Educators Can Support Emergent Writing - Exit Slip			2.00
In class activities total Simple weighted mean of grades. Include empty grades.			20.00
Course total Weighted mean of grades.			100.00

To create a category:

1. Go to the bottom of the Gradebook setup and select **Add category**.

2. Give a **Category name** (same as course outline).
3. Set the **Aggregation** as **Weighted means of grades** if the weighting is different for each component part. Set the **Aggregation** as **Means of grades** if each activity is out of the same amount and has the same weighted value. The latter would be used for a collection of activities such as forums.
4. **Show more.**
5. Select **Exclude empty grades**.
6. **Save changes.**

Creating New Items

Occasionally, you will need to add items to Moodle gradebook.

Examples:

- Graded in-class activities
- Lab work

1. Go to the bottom of the Gradebook setup and select **Add grade item**.

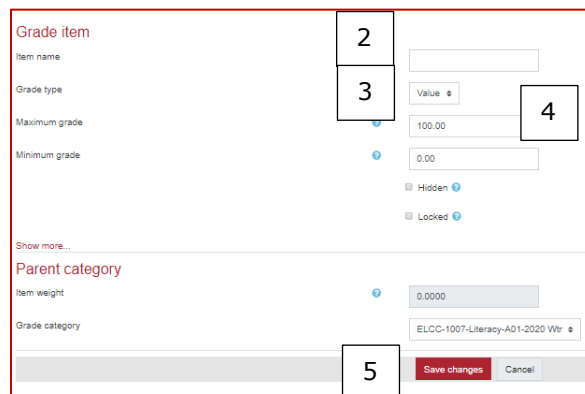

2. Enter **Item name**.

3. Select **Grade type** (typically **Value**).

4. Enter the **Maximum grade**: what the total of your graded item.

5. **Save changes**.

A screenshot of the 'Grade item' form in Moodle. The form is divided into two sections: 'Grade item' and 'Parent category'. The 'Grade item' section contains fields for 'Item name', 'Grade type' (set to 'Value'), 'Maximum grade' (set to '100.00'), and 'Minimum grade' (set to '0.00'). There are also checkboxes for 'Hidden' and 'Locked'. The 'Parent category' section contains fields for 'Item weight' (set to '0.0000') and 'Grade category' (set to 'ELCC-1007-Literacy-A01-2020 Wtr'). At the bottom of the form are 'Save changes' and 'Cancel' buttons. Numbered callouts are present: '2' points to the 'Item name' field, '3' points to the 'Grade type' dropdown, '4' points to the 'Maximum grade' field, and '5' points to the 'Save changes' button.

Moving items into a category

The best practice is to have your Gradebook categories set up before entering assignments and quizzes on your course page. When you are editing the individual assignments/quizzes on the course page, you can choose the gradebook category.

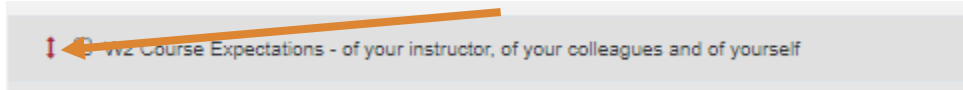

Assignment/Quiz > Edit settings > Grade > Grade category

A screenshot of the 'Grade category' dropdown menu in Moodle. The dropdown is open, showing three options: 'Uncategorised', 'Uncategorised', and 'In class activities'. The 'In class activities' option is highlighted with a blue background. The 'Grade category' label and a question mark icon are visible to the left of the dropdown.

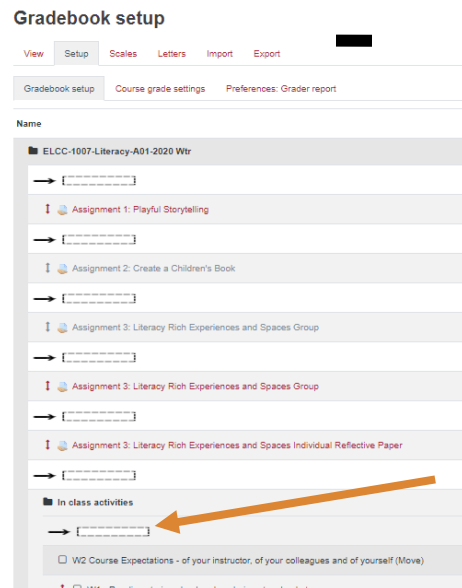

If you have not done this, items will appear in Gradebook in the order that you have created them. It will be necessary to move the assignments/quizzes to the appropriate categories. You may also want to move items to match the order you have these graded items listed in your course outline.

Steps:

1. Add the Assignments to the new **Assignments** category by clicking on the *Move* button.

2. A new page will appear. Choose the box that reflects the appropriate location.

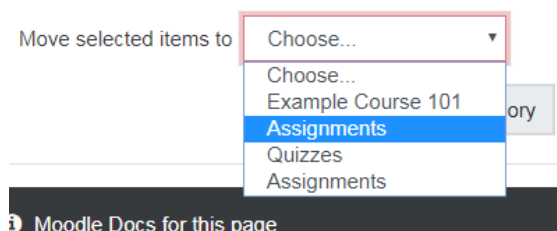

3. Click **Save**.

NOTE: If you are moving several items into a category, there is a faster method:

1. Click the checkboxes on the right of the activities you'd like to move into a category:

Name	Weights	Max grade	Actions	Select
Example Course 101	-		Edit ▼	All / None
Assignment 1	1.0	Pass (2)	Edit ▼	☒
Assignment 2	1.0	100.00	Edit ▼	☒
Assignment 3	1.0	100.00	Edit ▼	☒

2. Scroll down to the bottom of Gradebook Setup and select the Category you'd like to move these activities to:

Adding Marks

Most items are graded within the assessment tool (assignment or quiz). Marks appear in the Moodle gradebook automatically. On occasion, you may need to manually override marks or enter a column of marks for an assessment not documented on the Moodle course page.

If you need to enter marks for a graded item:

The screenshot shows the 'Grade user or grade item' interface. At the top, there's a 'Single view' dropdown. Below it, a navigation bar includes 'View', 'Scales', 'Letters', 'Import', and 'Export'. The 'View' tab is active, and a sub-menu shows 'Grader report', 'Grade history', 'Overview report', 'Single view' (highlighted), and 'User report'. A box labeled '1' is around the 'View' tab. A box labeled '2' is around the 'Single view' option. A box labeled '3' is around a dropdown menu showing 'Select grade item', 'Assignment 1: Playful Storytelling', 'Assignment 2: Create a Children's Book', and 'Assignment 3: Literacy Rich Experiences and Spaces On'. Below this, a box labeled '4' is around the 'Override All / None' link. A box labeled '5' is around the 'Grade' column header. The table shows a range of '0.00 - 2.00' and a grade of '1.00'. A feedback message says 'Some of your points are vague and don't show a direct connection to emerg'.

1. Go to **View > Single View**

2. **Select grade item**

3. Choose the activity you want to grade in the drop down menu.

4. Select **Override**.

5. Put in the grades.

6. **Save**.

Note: Single view also allows an instructor to view either all the grades of one single student or a single grade item for all students. **Grades may be excluded, or overridden and modified.** It is also possible to bulk insert a grade, which might be useful, for example, if you wish to give the grade 0 to all students who did not submit work. (For more information email moodle@norquest.ca.)

Checking your students' view of their gradebook: User Report

The **User Report** is what the students view when they access **Gradebook**. After inputting grades, it is best practice to check the **User Reports as the User** to double check your Gradebook set-up.

The screenshot shows the 'User Report' interface. At the top, there's a 'View' dropdown. Below it, a navigation bar includes 'View', 'Setup', 'Scales', 'Letters', 'Import', and 'Export'. The 'View' tab is active, and a sub-menu shows 'Grader report', 'Grade history', 'Outcomes report', 'Overview report', 'Single view', and 'User report' (highlighted). A box labeled '1' is around the 'View' tab. A box labeled '2' is around the 'User report' option. A box labeled '3' is around a dropdown menu showing 'Select all or one user', 'All users (33)', and 'View report as'. A box labeled '4' is around the 'User' option.

View > User Report > Select all or one user > View report User
