

Activities: Choice

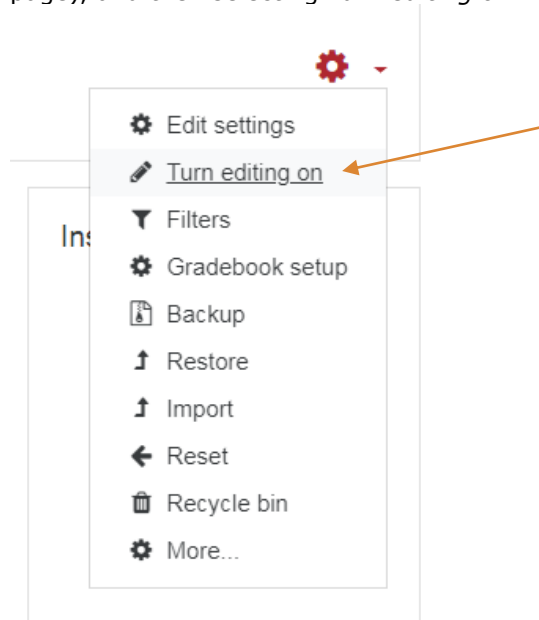

The Choice activity is great for quick class polls – contentious issues in the media (for great discussions after), due date preferences, or even allowing students to pick a specific topic or group for an assignment!

Contents

1. Add a Choice
2. Edit Choice Settings
3. Using a Choice
4. Adding/modifying/deleting a student's response

Add a Choice:

1. Turn editing on by clicking on the *Settings* button (top right hand side of your Moodle course page), and then selecting *Turn editing on*.

2. In the section where you would like to place your choice activity, click on **Add an activity or resource**.
3. Click on **Choice**, and then click on **Add**.

Edit Choice Settings:

1. Give your choice a **name** (required) and a **description**. This description should be used for instructions or further information that the student may need to make their choice.
2. Choose the **display mode for the options**, using the dropdown menu. You can choose to display the options either horizontally (left to right) or vertically.
3. **Options section:** Here is where you will determine the type and number of options available to the student. This also includes placing limits on how many students can choose an option. This is a great option if you would like to use the choice activity to allow students to pick topics or groups for assignments.
 - a. **Allow choice to be updated** – students can change their choice if this is set to yes.
 - b. **Allow more than one choice to be selected** – allows students to make more than one choice.
 - c. **Limit the number of responses allowed** – this allows you to limit how many students can pick one choice. Great for limiting the number of students who can pick a certain topic or group for an assignment.
 - d. **Option 1/2/3... and Limit 1/2/3...:** In the **Option** field, type in the choice that students can pick. If you have **Limit the number of responses allowed** enabled, you can choose how many students can pick that option, using the Limit field.

Option 1	 	Group 1
Limit 1		3

4. **Availability section:** Set when students can respond to the choice activity and whether students can see the choices before they are allowed to respond (Show preview).

▼ Availability

Allow responses from	10	December	2018	10	30		☒ Enable
Allow responses until	17	December	2018	10	30		☒ Enable

☒ Show preview 

5. **Results section:** Set results publishing options, privacy of results, column that shows how many users did not answer the poll, and whether to include responses from inactive/suspended users.

- a. **Publish results:** Using the dropdown menu, you can choose whether results will be displayed to students or not. This includes when results can be displayed, eg. after the poll has closed.

Publish results	Do not publish results to students ▼
Privacy of results	Do not publish results to students Show results to students after they answer Show results to students only after the choice is closed Always show results to students

- b. **Privacy of results:** Choose whether the results are anonymous or if students' names are published along with the choice they've made.

Privacy of results	Publish anonymous results, do not show student names ▼ Publish anonymous results, do not show student names Publish full results, showing names and their choices
---------------------------	--

- c. **Show column for answered:** this shows how many users have not made a choice yet.
- d. **Include responses from inactive/suspended users:** allows students who have read-only access mode to make a choice in this poll (not recommended).

Using a Choice:

Please use the choices below to pick the group you will be in for the class project.

Full results, showing everyone's choices, will be published after the activity is closed.

- ☐ Group 1
- ☐ Group 2
- ☐ Group 3
- ☐ Group 4
- ☐ Group 5

Save my choice

1. To make a choice, click on the radio button next to the choice you would like to make. Then click on **Save my choice**.
2. Depending on what options were chosen in the **Results** section, the results of this poll may be displayed to the user. This includes the names of other students if the results were set to be published with student names.

Responses

Choice options	Group 1	Group 2	Group 3	Group 4	Group 5
Number of responses	0	0	1	0	0
Users who chose this option			☐  Test Mel		

Adding/modifying/deleting a student's response:

As an instructor, you have the ability of modifying a student's response to a poll. This is useful, for example, if a student did not pick a group in time. You can then make the choice for the student.

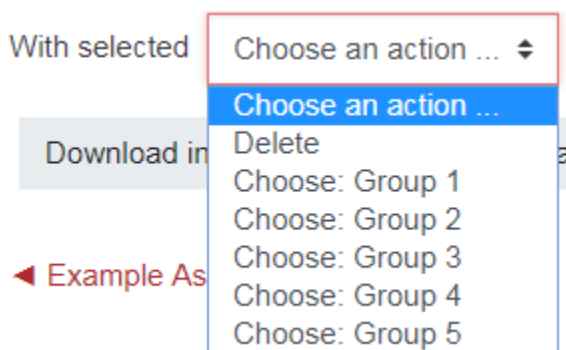

1. In the choice activity, click on **View # responses** on the top right hand side of the poll.

2. Click the checkbox next to a student's profile picture.

3. Locate the dropdown menu at the bottom of the results. You can then choose to delete a student's response, or move them to another choice.

Note: on this page, there are also options for downloading the responses. You can choose to download the responses as an ODS file, in Excel format, or as text.

Download in ODS format

Download in Excel format

Download in text format
