

Editing your Profile

It is important to check your Moodle profile for accuracy and to add a picture and profile description. The picture will follow all your Moodle communication. It is important to have students also check and update their profiles. Including instructor/student pictures helps students identify with their instructor and conversely instructors with their students.

Steps to Checking and Editing your Profile

1. Click on your name in the right top corner of your course.
2. A drop down menu will appear.

3. Click on "Profile". Your profile will load. Click on "Edit Profile.":

4. It is important to include a picture in your profile. This will be attached to any communication you do with your students in Moodle. (Encourage your students to upload pictures of themselves to their profile as well. This will help you memorize students' names, and remember student emails. It is especially important for blended and online courses.)

Find a picture of yourself that you like and save it on your computer. Drag and drop the picture into the drop box provided **or** use the **Add** button on the top left of the **New Picture** section to navigate through your files to find the photo.

5. Add a **Picture description**. (Joan Wall, Instructor) Picture descriptions allow students using text reading software to know what the image is. In terms of universal design, it is important to include picture descriptions.

6. There are other settings in the profile, in the categories **Additional names**, **Interests**, and **Optional**. You 'may' want to include the phonetic pronunciation of your name in the **Additional names** section and provide a link to any web sites you are hosting that you want students to view in the **Optional** section. Otherwise, you may ignore most of the other profile settings.
7. When you are finished, click the **Update profile** button at the bottom of the screen.
