

Welcome to the Instructor Role at NorQuest College

NorQuest College uses **Moodle** as their Learning Management System (LMS). This tip sheet discusses how to access Moodle, find your courses, and seek support. See specific topics below:

1. [How to access Moodle](#)
2. [Accessing login credentials](#)
3. [How to Find your Moodle courses](#)
4. [Help: Courses are not listed in Moodle](#)
5. [Life cycle of a Norquest Moodle course](#)
 - i. [When do I have access to the courses I teach?](#)
 - ii. [When do my students have access to the courses?](#)
 - iii. [How do I find a course that is searchable \(4 months prior to course start\)](#)
6. [Course content](#)
7. [Where should I start?](#)
8. [Student Support](#)
8. [Student account life cycle time line \(detailed diagram\)](#)
9. [Moodle course life cycle time line \(detailed diagram\)](#)

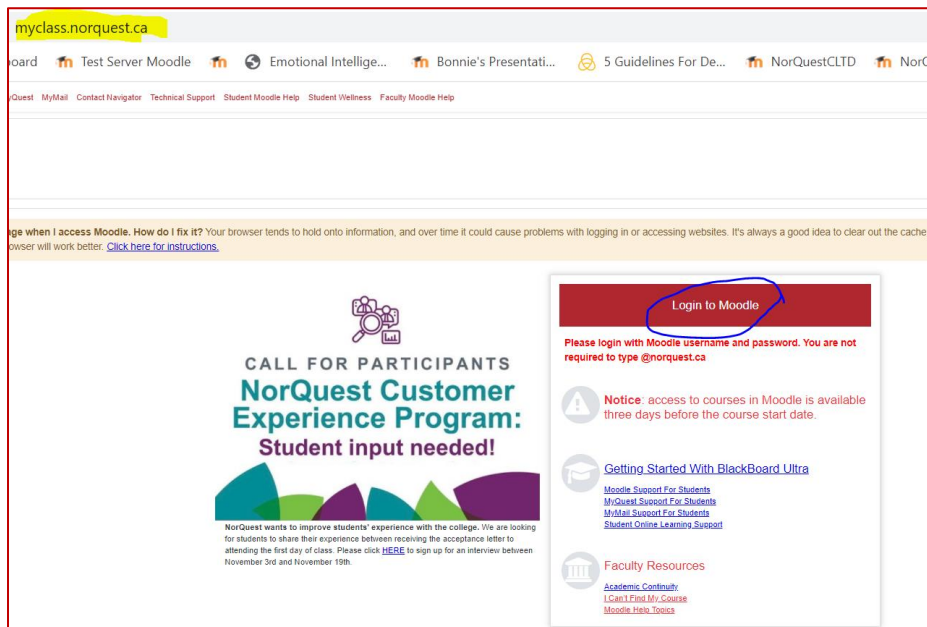

How to Access Moodle:

Moodle is a free and open-source learning management system (LMS). NorQuest College uses several Moodle platforms to meet the needs of our learners and our faculty.

Moodle instance	Web address	Purpose
*MyClass Moodle	myclass.norquest.ca	student courses
CLTD Moodle	moodle-cltd.norquest.ca	staff/faculty training environment
Con-Ed Moodle	In development	continuing education platform

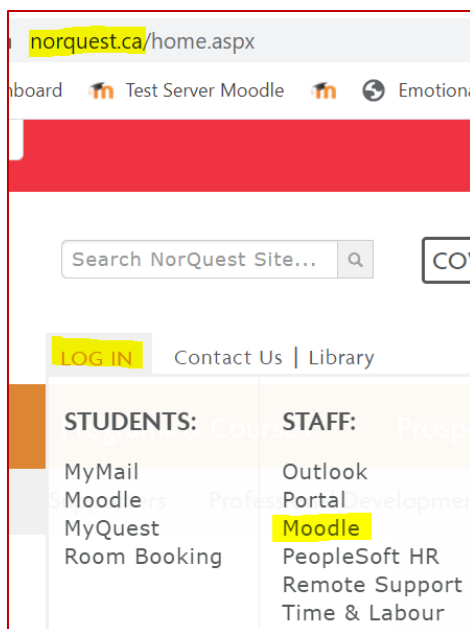

**You will be using this platform to teach.*

You may use the web addresses in the table above to locate Moodle. **Using the Chrome browser is recommended.** When you enter the URL, you will be prompted to sign into Moodle.

You must have NorQuest credentials (email address and password) to log into Moodle. These NorQuest credentials, are the same for your computer login. You will have to set-up a multi-factor authentication to access this site. See tip sheet: [How do I set up multi-factor authentication using a texted code.](#)

Some faculty choose to login into the NorQuest website to access Moodle. In your Chrome browser type norquest.ca At the top left of the page, select **Log In** and **Moodle**. This is an additional step.

Accessing login credentials

Your Program Chair or Associate Chair will get login credentials for you by completing a **New User Request form** on **TheQ**. **TheQ** is Norquest's Intranet (password protected) site.

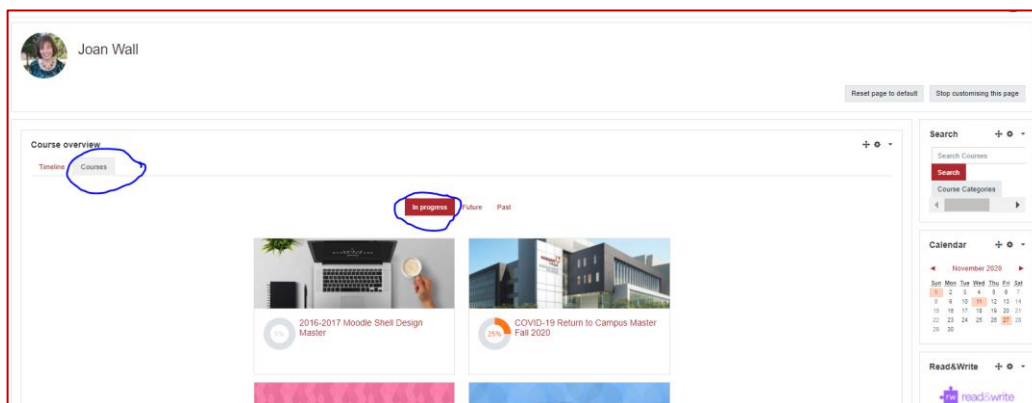

theq.norquest.ca > Tools IT Service Portal > [I need an account for a new employee](#)

Once you have NorQuest credentials, your division scheduler will attach you to the courses you are designated to teach in PeopleSoft. **PeopleSoft** is an e-business software that assists in the day-to-day execution of various business operations tasks. PeopleSoft **Student** assists with student and faculty enrollment in Moodle. It is also where you will record a students' final grades for transcripts and attendance (if required).

How to find your Moodle courses

(30 days prior to course start)

After you login into Moodle, the Moodle Dashboard will open. Select the tab Courses, to see your **In progress** courses. See below, the default view of the Dashboard.

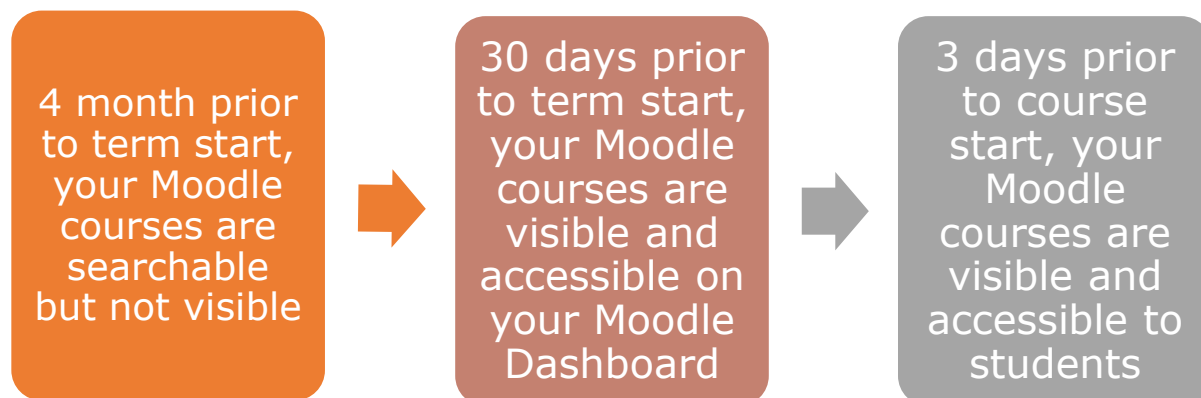

Help: Courses are not listed in Moodle

(30 days prior to course start)

There is an expectation that your Chair or Associate Chair will make sure you have access to Moodle and your courses when you begin your teaching journey at NorQuest. If you do not see the course listed in Moodle, ask your Chair, Associate Chair or Division scheduler to make sure you are attached to the correct courses in PeopleSoft. PeopleSoft and Moodle 'talk' to each other overnight. Therefore, it may take up to 24 hours for your courses to appear in Moodle.

Life cycle of a Norquest Moodle course:

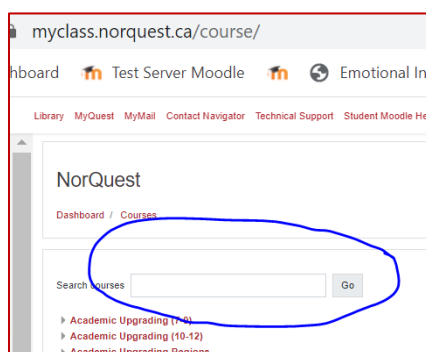

A. When do I have access to the courses I teach? When do my students have access to the courses?

For a more detailed overview of a course life cycle, see addendums: [Student Account Life Cycle Time Line](#) and [Moodle Course Life Cycle](#), and tip sheet Roles in Moodle

B. How to find a course not on my dashboard (searchable)

To search for your course use: <https://myclass.norquest.ca/course/> When searching for your course use the 3-4 letters and 4 numbers associated with the course, the term and the year. If you know the section number, you may use this as well.

Example: To search for a Social Studies course titled: SST-2772-Social Studies 20-2-001-2021 Wtr

Search: SST 2772 2021 Wtr

Course Content

NorQuest College departments may have different procedures regarding populating your course content. It is expected the Chair of your program, or their designate, will make sure you have access to Moodle and your course is populated with course content. Your course content will come from a 'Master' course; a Master course is a course that all faculty teaching the same course uses as a guide.

You must keep all course content true to the course outline; the course outline is the contract between you and the student. Departments may allow you to change course content as long as the course outcomes are being met, and the assessments do not contradict what the course outline states. If it is the first time teaching a course, you may not want to adjust the course content. Check with your department regarding the expectations of following the Master course.

If your course has no content:

First: Check your course settings. It is possible that the course content is hidden.

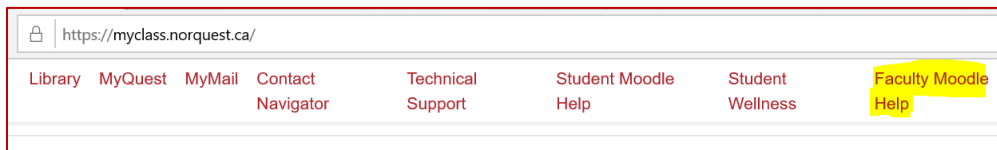

- i. On your Moodle page, go to the gear top right of the course page.
- ii. Select **Edit settings**.
- iii. Go to **Course format > Number of sections**. The number of sections must not be 0. Change the number of sections to any number to view course content. You may increase the number of sections at any time.

Second: Ask for assistance. Check with your Chair or their designate to get support. **In future terms** you may be required to copy your course content from a Master course. See tip sheets: [Content Copy](#).

Where should I start?

You are not alone. There are many supports for you to access. After you take time to review your course content, you may want to take advantage of the supports offered to you.

1. Check out **Faculty Moodle Help** tip sheets and videos. See the link at the top of every Moodle course page:

2. Look for LRN sessions to help you learn how to use this software, and how to teach in online, blended and F2F environments. You must be logged into Norquest to access this learning network.
lrn.norquest.ca
3. Reach out to Moodle@norquest.ca for individual support on how to use tech teaching tools, teaching tips and curriculum design principles.
4. Contact servicedesk@norquest.ca for immediate tech issues.
5. Use the [IT Service Desk Service Portal](#) for non-immediate tech needs.
6. Reach out to your faculty peers.

Student Support:

Students may contact computercommons@norquest.ca for Moodle and tech support.

Phone:

[780.644.6085](tel:780.644.6085)

Email:

computercommons@norquest.ca

Monday - Friday:

7:30 am – 7:00 pm

Saturday:

8:00 am – 4:00 pm

Closed:

Sundays and statutory holidays

Student Account Life Cycle Timeline

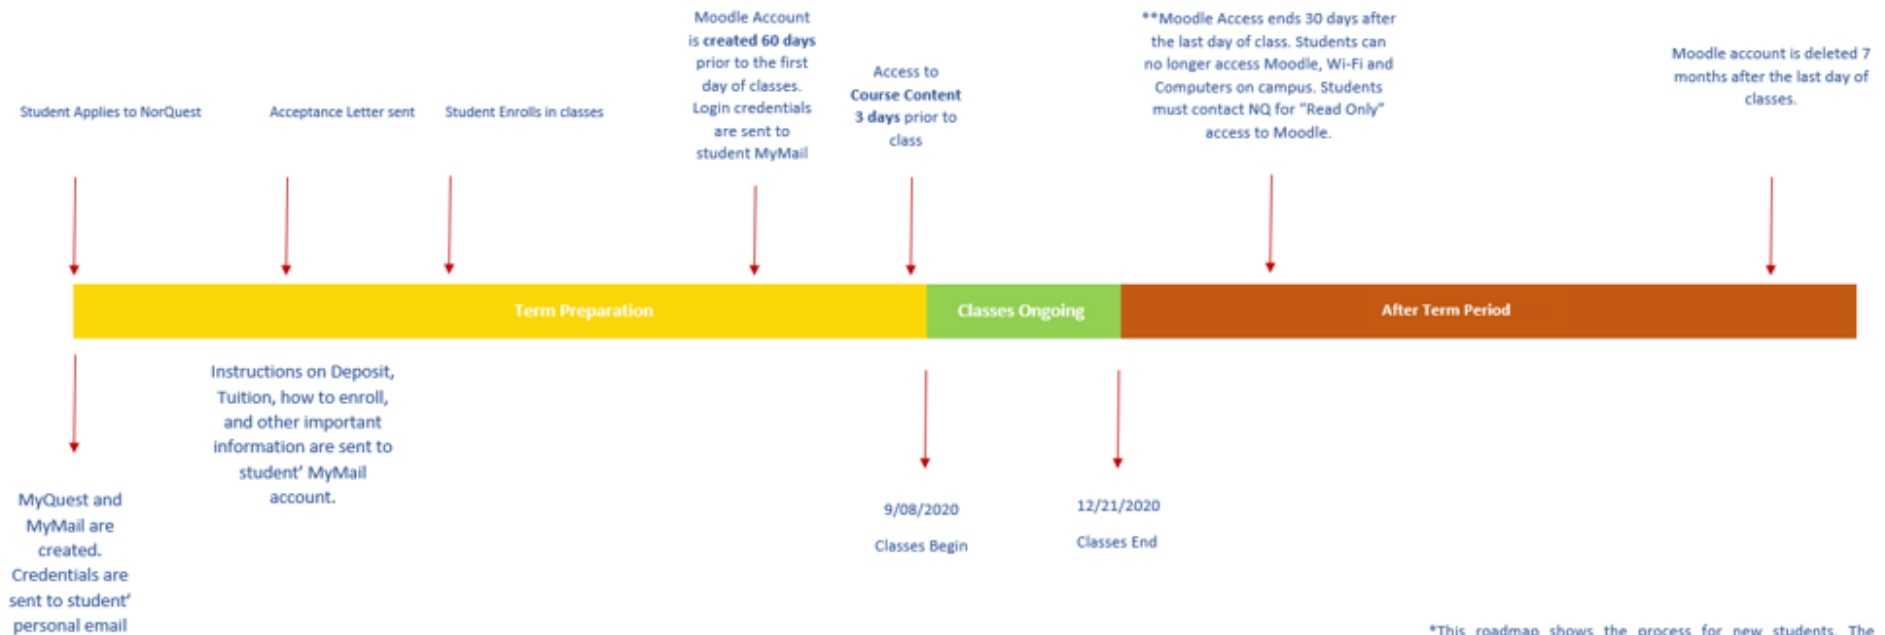

Diagram created by Computer Commons

*This roadmap shows the process for new students. The timeline may vary depending on the program and enrollment date.

**If a student is enrolled for the next term that is within 140 days of the last class end date, then the student Active Directory account should not be deleted.
