

Add a Quiz Quiz

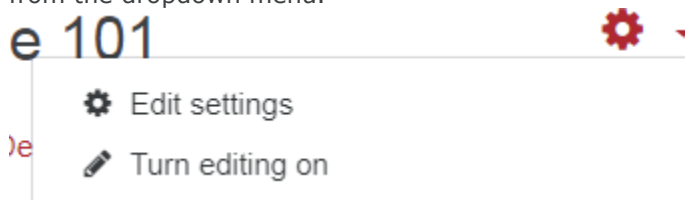

Moodle quizzes may be for formative or summative assessments. The purpose of the quiz determines the settings for a quiz.

- Quiz Settings
- Adding Quiz Questions

Adding a Quiz

1. Go to the course home page.
2. Click on the **Settings** button at the top right of the page, and select **Turn editing on** from the dropdown menu.

3. Click **Add an activity or resource** in the Section where you would like to insert a quiz.
4. Click on the radio button next to Quiz and click on the **Add button**.

The "**Adding a new Quiz page**" will appear.

☐ Display description on course page

Quiz Settings

5. Type a **Quiz Name**: The Name will be the title of the quiz along with the associated Moodle module. Choose a name that is specific and clear for easy student navigation. (example **M2 Quiz-Public Schools**, where M2 stands for Module 2)

M2 Quiz Public Schools

6. **Description**. The description is very important. The student will learn about the quiz value, what the quiz covers and any relevant instructions.

Value:

Background:

Instructions:

Value: Is this a graded quiz? Is it a required quiz? How much is this quiz weighted towards (%) the final grade?

Background: Why is completing this quiz important? How does it relate to the learning outcomes?

Instructions: Review the steps to complete the quiz. If this is the first time students are taking a quiz in your course you may like to include some navigational instructions.

There are 20 multiple choice questions. Please read each question carefully.

*Each question is on its own page. When you have selected your response, select **Next** at the bottom left of the test question page. When you have completed the twenty questions you will have the option to return to the test to make edits. If you are finished reviewing the test, click **Submit all and finish**.*

Note: Within each question you may post instructions. For instance, if you have a matching question, you may add "Use the drop down menu to match the following terms."

7. Timing:

▼ Timing

Open the quiz	4	January	2019	15	43	☐	Enable
Close the quiz	4	January	2019	15	43	☐	Enable
Time limit	0	minutes	☐ Enable				
When time expires	Open attempts are submitted automatically						
Submission grace period	1	days	☒ Enable				

Select the dates for the quiz by clicking on the **Enable** box.

Is there a time limit? If so, use **Time limit**. **Time left** is displayed for the student during the quiz. Be careful to select the appropriate time units.

Please use the default "**Open attempts are submitted automatically**" setting for **When time expires**. The other choices are: - **Submission grace period** Students are no longer to add to the test but are still required to **Submit all and finish** prior to the extra time allotted (**Submission grace period**), and -**Attempts must be submitted before the time expires or they are not counted**. All student work will not be counted for the latter setting.

More about timing:

For most of these settings, you will need to click the enable box first. This opens the options.

If you are constructing a practice test, you may want the students to be able to access the quiz throughout the course. Do not put dates to open and close the quiz. As well, consider leaving the time limit inactivated.

8. Grade

Grade

Grade category ?

Uncategorised

Grade to pass ?

Attempts allowed

Unlimited

Grading method ?

Highest grade

If you have **Grade categories** set up in our Gradebook, you may select the category, and the quiz will be displayed within that gradebook category. This makes the gradebook easy to navigate.

If you set the **Grade to pass**, grades that are green in gradebook represent passing marks, whereas red grades denote failed marks. Also useful for activities using 'Restrict Access' settings. Optional.

Attempts allowed-
Most summative tests allow one attempt. However, if you are designing a formative test, you may want to make the number of attempts greater than one or limitless.

Grading Method is only activated when you select more than one Attempts allowed. Choices are the **First grade, Highest grade, Average grade** and **Last grade**. If you are allowing multiple attempts and the quiz is graded, consider using the Average grade. Students will have to attempt the quiz multiple times to raise their mark. The repetition will assist the students to recall the material at a later date.

9. Layout:

Layout

New page ?

Every question

Navigation method ! ?

Free

Show less...

New page- Use the default setting **Every question**. To protect test security it is important to have one question per page.

Navigation method- Use the default setting **Free**. This setting allows students to move in a non-sequential fashion throughout the test.

10. Question Behavior:

▼ Question behaviour

Shuffle within questions 

How questions behave 

Allow redo within an attempt 

Each attempt builds on the last 

Show less...

Shuffle within questions- Be careful with this setting. If you shuffle within questions, multiple choice question choices will be shuffled. If you use All of the above, or Answers A & B only, the randomization will create invalid responses.

How questions behave, Allow redo within an attempt and Each attempt builds upon the last are settings important when you have multiple attempts on a formative test. **Deferred feedback** makes the student complete the entire test before knowing their performance on questions. If you allow the students to have multiple attempts, consider leaving the default **No** for **Each attempt builds upon the last**. You want the student to review the entire test, not just questions they answered incorrectly. There is a possibility that the student needs to review correct responses for reinforcement.

- 9. Review Options:** When you want the students to review their quiz attempt depends upon whether this is a practice test (activity) or a summative test.

For a summative test, you would want the quiz closed before students are able to review the test. For test security, you may choose for students to only know their mark. If the questions are going to be used with another group, you want to ensure test security.

10. Appearance: Consider leaving these appearance settings in the default mode. The default for Moodle grade calculation for decimal places is 2.

11. Extra Restrictions on attempts:

Require password: If you are opening a test for students at a specific time using the **Timing** setting, there is no need to use a password for your test. Sometimes faculty want passwords because students are writing a test at different times. These passwords may be shared. Therefore, any student writing a test at a different time should have a user override set (and a different password if necessary). Passwords should be kept simple, but not follow a pattern.

Enforced delay: If you are allowing students to have multiple attempts on a quiz, you do not want students to simply memorize correct responses. Setting a time between attempts encourages students to review their coursework.

Allow quiz to be attempted offline using the mobile app: the Moodle app is not supported by the College as of this writing (Jan. 2019), so keep this setting as 'No'.

Allow quiz to be attempted offline using the mobile app ?

No

- 12. Overall Feedback:** Please consider using this useful automated feedback. If the quiz is a major quiz at the beginning or mid-term of your course, it is important to encourage students to continue their positive progress. If students are not meeting the course requirements, it is equally crucial that you are able to offer support and guidance. You are able to set the grading parameters. Use the percent sign (%) with the set grades.

▼ Overall feedback ⓘ

Grade boundary	100%
Feedback	            Excellent work! You have excelled in this test.
Grade boundary	90%
Feedback	            Very good!
Grade boundary	80%
Feedback	            Well done. Make sure to continue to read the class notes to help you maintain and increase this passing grade.
Grade boundary	60%
Feedback	            Please make an appointment to see me.
Grade boundary	
Feedback	           
Grade boundary	0%

[Add 3 more feedback fields](#)

13. Common Module Settings: Use this section to hide the quiz or assign groups.

14. Restrict access: Allows you to not have the quiz open until certain criteria are met.

Add restriction...

Date	Prevent access until (or from) a specified date and time.
Grade	Require students to achieve a specified grade.
Group	Allow only students who belong to a specified group, or all groups.
User profile	Control access based on fields within the student's profile.
Restriction set	Add a set of nested restrictions to apply complex logic.

Cancel

15. Click on the **Save and return to course button** to return to the course or the **Save and display** button if you would like to work on your quiz right away.
