

Quiz – Drag and Drop Quiz

There are three different drag and drop style questions:

- Drag and drop onto text
- Drag and drop onto markers
- Drag and drop onto an image

Question 1
Not yet answered
Marked out of 6.00

My first name is .

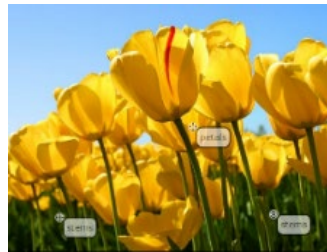

I live in .

I last name is .

I work at this college .

My husband's last name is .

He lives in .

- Drag and Drop onto Markers

Adding a quiz question (general instructions)

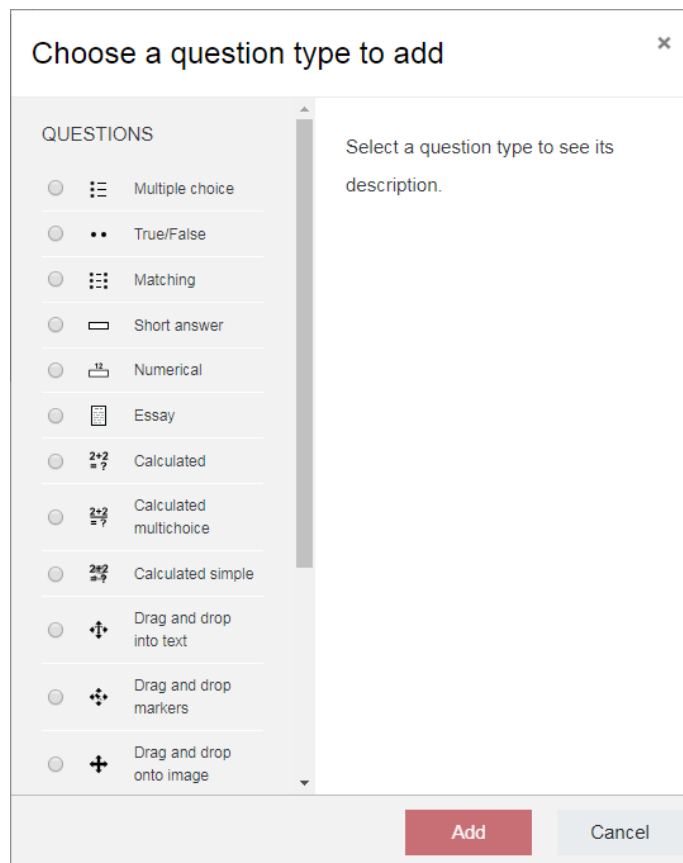

1. Click the Quiz title on the course main page.
2. Click **Edit quiz** in the **Settings menu**.

- Click on the **Add** link.

- From the drop down menu, select a new question.
- Choose the type of drag and drop question you would like to add from the pop-up window.

- Click **Add** button to view the settings page of the question type.

Drag and Drop into Text

1. Make a question name that describes the content of the question.
2. Write out your text giving answers using [[1]] to identify correct responses.

Question name ⓘ

Question text ⓘ

My first name is [[1]].

I live in [[2]].

My last name is [[3]].

I work at this college [[4]].

My husband's last name is [[3]].

He lives in [[2]].

3. Review default mark and adjust as necessary.

Default mark ⓘ

4. Identify correct responses. Remember you can use 'unlimited' to describe answers that can be used more than once. [Option – If you have a lengthy or varied topic assignment, you can colour code responses/answer blocks by designating different groups for answers.]

▼ Choices

☐ Shuffle

Choice 1	Answer Joan	Group 1	☐ Unlimited
Choice 2	Answer Edmonton	Group 1	☐ Unlimited
Choice 3	Answer Wall	Group 1	☐ Unlimited
Choice 4	Answer NorQuest	Group 1	☐ Unlimited

5. Decide on optional settings: combined feedback and multiple tries penalty and hints.

Combined feedback

For any correct response

1 **i** **B** **I** **☰** **☷** **🔗** **📎** **📷** **📹** **📱** **📧**

Your answer is correct.

For any partially correct response

1 **i** **B** **I** **☰** **☷** **🔗** **📎** **📷** **📹** **📱** **📧**

Your answer is partially correct.

Options

☒ Show the number of correct responses once the question has finished

For any incorrect response

1 **i** **B** **I** **☰** **☷** **🔗** **📎** **📷** **📹** **📱** **📧**

Your answer is incorrect.

Multiple tries

Penalty for each incorrect try

33.33333%

Hint 1

1 **i** **B** **I** **☰** **☷** **🔗** **📎** **📷** **📹** **📱** **📧**

Hint 1 options

☐ Options ☐ Clear incorrect responses ☐ Show the number of correct responses

Drag and Drop onto an Image

1. Make a question name that describes the content of the question.
2. Give directions under 'Question text'.

Question text

1 **i** **B** **I** **☰** **☷**

- Identify the parts of a horse.
- Drag the text to the blank spaces.

3. Review default mark and adjust as necessary.

Default mark

4

4. Optional: General feedback – shown to all students regardless of the students' response. (It may be used to show the correct answers.)

General feedback

1 **i** **B** **I** **☰** **☷** **🔗** **📎** **📷** **📹** **📱** **📧**

5. Drag your background image or choose a file on your computer.

Select a background image, specify draggable items and define drop zones on the background image into which they must be dragged.

[Refresh preview](#)

Background image [Choose a file...](#) Maximum size for new files: 500MB

chestnut-horse-conformation-shot.jpg - You can drag and drop files here to add them.

6. **Draggable items:** You may choose to drag text or images onto the background image.
[Option – If you have a lengthy or varied topic assignment, you can colour code responses/answer blocks by designating different groups for answers.]

▼ **Draggable items**

☐ Shuffle drag items each time question is attempted

Draggable item 1

Type Draggable text Group 1 ☐ Unlimited

You can drag and drop files here to add them.

Accepted file types:

Image (GIF) .gif
Image (JPEG) .jpe .jpeg .jpg
Image (PNG) .png
Image (SVG+XML) .svg .svgz

Text

7. **Drop zones:** Your image is broken up into squares typically with the length at 600 and the width at 400. **Thankfully, you do not need to do any coordinate geometry to figure out where to place your draggable items!**

Before expanding the Drop zones section underneath Draggable items, click on **Save changes and continue editing.**

Expand the Drop zones section if it isn't already open, and select the draggable items for each Drop zone from the dropdown menus (pictured). You can leave the rest of the boxes blank. These will be filled in later during the next step.

▼ Drop zones

Drop zone 1	Left	Top	Draggable item	1. Head ▾	Text
Drop zone 2	Left	Top	Draggable item	2. Back ▾	Text
Drop zone 3	Left	Top	Draggable item	3. Tail ▾	Text
Drop zone 4	Left	Top	Draggable item	4. Front legs ▾	Text
Drop zone 5	Left	Top	Draggable item	1. Head 2. Back 3. Tail 4. Front legs 5. Hind legs	Text
Drop zone 6	Left	Top	Draggable item	4. Front legs 5. Hind legs	Text

Blanks for 3 more drop zones

Scroll back up to the image you are using for your question. You will find your draggable items underneath it. Click and drag these items to the spots where you want them on the image.

The coordinates for these items will now automatically appear in the Drop zones section:

Drop zone 1	Left 61	Top 57	Draggable item	1. Head ▾
Drop zone 2	Left 268	Top 96	Draggable item	2. Back ▾

- Decide on optional settings: combined feedback and multiple tries penalty and hints.

Combined feedback

For any correct response

1 **i** **B** **I** **≡** **≡** **🔍** **🔄** **📎** **📎** **📎** **📎** **📎** **📎** **📎** **📎**

Your answer is correct.

For any partially correct response

1 **i** **B** **I** **≡** **≡** **🔍** **🔄** **📎** **📎** **📎** **📎** **📎** **📎** **📎** **📎**

Your answer is partially correct.

Options

☒ Show the number of correct responses once the question has finished

For any incorrect response

1 **i** **B** **I** **≡** **≡** **🔍** **🔄** **📎** **📎** **📎** **📎** **📎** **📎** **📎** **📎**

Your answer is incorrect.

Multiple tries

Penalty for each incorrect try

33.333333%

Hint 1

1 **i** **B** **I** **≡** **≡** **🔍** **🔄** **📎** **📎** **📎** **📎** **📎** **📎** **📎** **📎**

Hint 1 options

☐ Options ☐ Clear incorrect responses ☐ Show the number of correct responses

Drag and Drop onto Markers

- Make a question name that describes the content of the question.
- Give directions under 'Question text'.

Question text

1 **i** **B** **I** **≡** **≡** **🔍** **🔄** **📎** **📎** **📎** **📎** **📎** **📎** **📎** **📎**

- Identify the parts of a horse.
- Drag the text to the blank spaces.

- Review default mark and adjust as necessary.

Default mark

4

4. Optional: General feedback – shown to all students regardless of the students’ response. (It may be used to show the correct answers.)

6. Identify your **Markers**, the number of times a response may be used, and whether you want the markers to be shuffled for every attempt.

Markers

☒ Shuffle drag items each time question is attempted

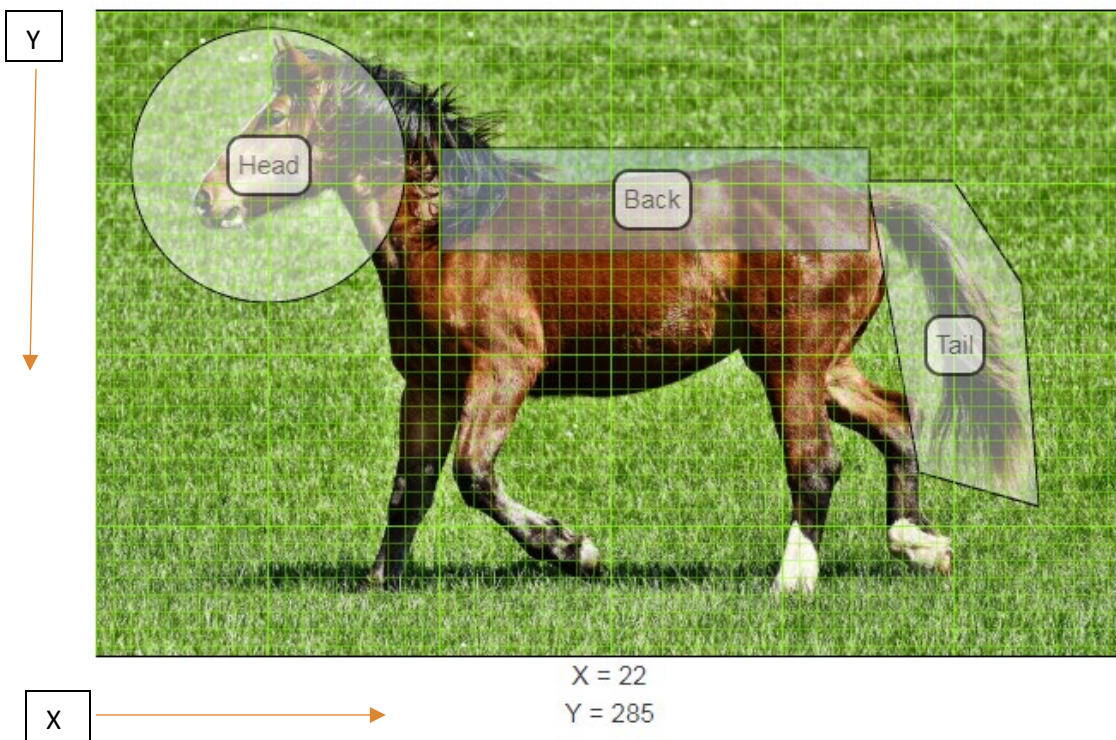

Marker 1	Head	Number	Infinite ↕
Marker 2	Back	Number	Infinite ↕

- 7. Drop zones:** Your image is broken up into squares with a total approximate length of 600 and width of 400. Each small square represents 10 pixels height and 10 pixels length. Larger squares represent 100 pixels height and 100 pixels length. You may choose to use a circle, rectangle or a polygon for your drop zone. Start from the far left when counting pixels for the x-axis, and top left when counting pixels for the y axis. Use the examples below for guidance:

Head circle 100,90;80 [x,y;radius] (First 2 numbers are the coordinates for the centre of the circle)

Back rectangle 200,80;250,60 [x,y;l,w] (First 2 numbers are the coordinates for the top left corner of the rectangle, next 2 numbers are the length and width of the rectangle)

Tail polygon 450,100;500,100;540,160;550,290;480,270 [x1,y1;x2,y2;x3,y3;x4,y4...] (x1,y1 are the coordinates of the first vertex, x2, y2 coords. for second....)

8. Decide on optional settings: combined feedback and multiple tries penalty and hints.
