

Editing a Quiz and Adding Quiz Questions

The Moodle quiz is a useful tool that can be used for formative and summative tests. You can choose from a large variety of question types; for example, True/False, Multiple Choice, Drag and Drop. Most quiz test items are marked automatically in Moodle, which provides students with instantaneous and useful feedback for their learning.

Adding New Questions

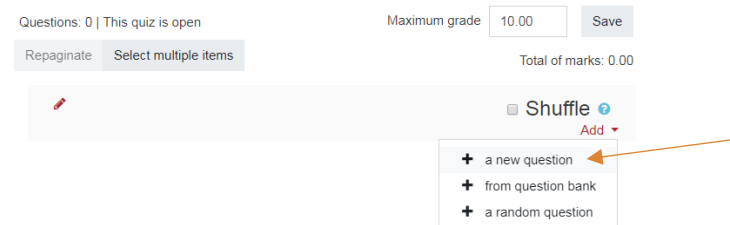

How to add a question to your quiz.

Once you have turned editing on, choose to add a quiz from the drop down menu -- **Add an Activity and Resource**. A page will open to adjust the quiz settings. Once you have chosen the appropriate quiz settings, you are ready to enter quiz questions. When opening the quiz, if you have not constructed any quiz questions, you will be prompted.

Select **Edit quiz**.

A new page will be displayed. Choose **Add > Add a new question**.

Question Types

QUESTIONS

☐  Multiple choice

☐  True/False

☐  Matching

☐  Short answer

☐  Numerical

☐  Essay

☐  Calculated

☐  Calculated multiple choice

☐  Calculated simple

☐  Drag and drop into text

☐  Drag and drop markers

☐  Drag and drop onto image

☐  Embedded answers (Cloze)

☐  Random short-answer matching

☐  Select missing words

OTHER

☐  Description

There is an extensive variety of quiz question types. This Cheat Sheet will review the construction of the most common question types: **Multiple Choice, Matching and Essay**.

There are Cheat Sheets for specific quiz question types, including all the Drag and Drop question types.

Many of the question types are similar. **Select Missing Words** is similar to the **Drag and Drop text**. The former allows students to select an answer from a drop down menu, while the latter allows students to choose a word from a selection at the bottom of the written passage and drag it to a text box. Many students enjoy a variety of formative quizzes designed to test their learning.

Note: If you have math calculations as part of your student learning outcomes in your course, the following question types are useful: Calculated, Calculated multiple choice, Calculated simple and Numerical. Calculated questions, in particular, are time savers. Numbers are selected randomly from a set (and the answer is calculated through a given formula). Using this tool, you may create many questions by duplicating the question. Each time, a different set of numbers will be used in the next question. Repetition of questions is of importance in learning math skills. Quizzes may be used to assist student learning and retention.

Multiple Choice:

1. Select the radio button for Multiple Choice.  **Multiple choice**
2. Select **Add**.
3. **Categorize** and **name** your multiple Choice question. (See below.) This may seem like tedious work at first glance, but naming your questions, and saving them in your test bank under a specific category allows you to easily edit a test and a test question at a later date.
4. Input your **Question text**. As well as text, you may include pictures and other media.
5. Determine whether you need to adjust the **Default mark** for the question.

Moodle Quiz- Editing a Quiz, Adding Quiz Questions

Category

Question name !

Question text !

Creating a question name is mandatory. You should create a name that helps you identify the type of question in a list in the test bank.

Select the category for the test bank. The default will be your course, but you may want to include it in a separate category for the specific test.

freud come up with the belief that all thoughts and actions are d?

Write the question stem here.

Default mark !

The default mark is one for each question type in Moodle. Change it if your question should be weighted more.

6. **General feedback** (optional) is given to all students after they complete a question. It provides students with the reasoning behind a correct response or additional information. This is useful for tests designed to assist the student to study.

General feedback ?

Freud believed that the answers to what controlled daily actions resided in the unconscious mind despite alternative views that all our behaviours were conscious. He felt that religion is an illusion based on human values that are created by the mind to overcome inner psychological conflict. He believed that notions of the unconsciousness and gaps in the consciousness can be explained by acts of which the consciousness affords no evidence. The unconscious mind positions itself in every aspect of our life whether one is dormant or awake. Though one may be unaware of

7. Decide if you need to change any of the default settings for the number of correct responses (**One or more answers?**), **Shuffle the choices?** and how the choices are displayed (a. b. c.) (**Number the choices?**). Note: If you have responses such as 'All of the above' or 'A and B only,' you will need to change the default for shuffling questions by unchecking the text box.

forces in the personality that are often unconscious.

Grade

100%

Correct response.

8. **Answers:** Enter the distractor or correct response in the text box provided. As well as text, you may include pictures, and other media. If you have the answers shuffled, you do not need to be concerned with varying the order of the correct responses.

Select the **Grade**. Generally, incorrect responses are **None** while correct responses are **100%**. You may opt to give partial marks for questions with multiple correct responses or for semi-correct responses. To do this, use the drop-down menu to select the correct percentage. Limit the use of these types of questions: they are often confusing for the student.

Feedback (optional) given here is for the specific response. **Be careful not to use this field as an answer field.**

9. **Combined feedback** is used for general feedback.

How did Freud believe that all thoughts and actions are determined?

Select one:

- ☐ a. forces in the personality that are often unconscious.
- ☐ b. the first year of life.
- ☐ c. needs for love and self-esteem.
- ☐ d. forces in the personality that are often unconscious.

Your multiple choice question has been created!

Matching:

Creating matching questions is very similar to creating multiple choice questions. The question text is the directions. In the **Answers**, create the question and answer matches.

▼ Answers

Available choices

You must provide at least two questions and three answers. You can provide extra wrong answers by giving an answer with a blank question. Entries where both the question and the answer are blank will be ignored.

Question text

Essay question:

Essay questions need to be manually graded. It is important to give specific directions and consider changing the Default mark from 1.

Question name ⓘ

Question text ⓘ

Choose one of the following three iconic psychologists: Skinner, Freud, or Maslow. Review their contribution to the field of psychology today. Your answer should be a brief essay, with a minimum of 250 words. Please start your writing with a paragraph with an overview of the psychologist you have chosen and a thesis statement: ____ has contributed greatly to the field of psychology. This is a short writing assignment. You will need to be succinct in your response.

Default mark ⓘ

General feedback ⓘ

General feedback after every student has submitted the question. It may be an exemplary response.

In the **Response Options**, keep most of the default settings. However, the **Input box size** is helpful – a small or large box is a visual reminder of the length of response required. The maximum size is 40 lines.

Response Template allows you to put a template into the response field. This could be a writing prompt, or a table that students fill out.

Grader information: If you have multiple faculty using the same course and quiz, you may want to identify marking parameters.

Description

Description is a useful tool in test construction. If you have a reading passage that pertains to multiple questions, use the Description. You may also add a test rubric for students to review.

To add a Description, follow the directions to add a new test question. Scroll to the bottom of question types and select **Description** under **Other**. **Note:** If you are using a reading passage for specific questions on a test, **do not** shuffle the questions. You can move the Description to the appropriate part of the quiz. There is no value assigned to the Description.

The screenshot shows a Moodle question type selection interface. At the top, there is a search bar with the text "Select missing words". Below this, the word "OTHER" is displayed. Under "OTHER", there is a radio button next to a small icon and the text "Description". At the bottom right of the interface is a red "Add" button.

Description

Information

Read the following passage. Use the information contained in the passage to answer questions 1 to 5.

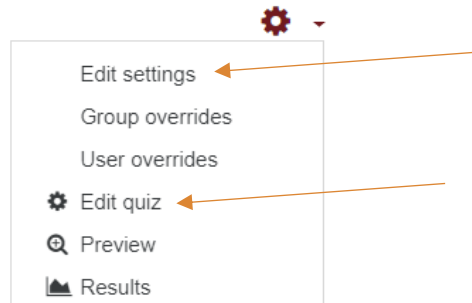

Jean Piaget (1896-1980) was a Swiss developmental psychologist and philosopher. Originally trained as a botanist, he developed one of the most important theories of cognitive development in the field of developmental psychology. He was born in the French-speaking part of Switzerland. The son of a university professor, Jean was an intellectually precocious child who was interested in the natural world and the subject of biology. Piaget was growing up during a time when Sigmund Freud's theory and practice of psychoanalysis was developing and becoming popular, which also influenced his interests.

Editing the Quiz (Including Questions)

1. Select the quiz on the course page.
2. Click the **Settings button** for the Settings menu. Select **Edit settings** to change the test settings. Change the settings as needed and select **Save and return to course** or **Save and display**.

3. To edit questions, click the **Settings button** for the Settings menu, and select **Edit quiz** to add, delete or edit questions. The questions on the test are listed by title and the beginning of the question text. It may also help to recognize the type of question icons.

Save

Total of marks: 3.00

Repaginate

Select multiple items

The screenshot shows the Moodle Quiz editing interface. At the top, it says "Questions: 4 | This quiz is open". Below this are buttons for "Repaginate" and "Select multiple items". On the right, there's a "Maximum grade" field set to "10.00" and a "Save" button. Below that, it says "Total of marks: 3.00". The main area displays a list of questions across four pages. Each question entry includes a crosshair icon for reordering, a gear icon for editing, a magnifying glass icon for previewing, and a trash can icon for deleting. The questions are: "M1 Famous Psychologist Freud How did Freud believe that", "M1 matching question for tipsheet Match the following psyc", "M1 Famous Psychologist Essay Choose one of the following", and "M1 Description example READ THE FOLLOWING PASSAG".

Select the **gear** beside a question if you would like to edit the question. (Example: fix spelling.)

The **magnifying glass** allows you to preview a test question. The **garbage can** when selected deletes a question. You may add more questions by selecting **Add**.
