

Setting up Review Quizzes in Moodle

This handout explains how to set up review quizzes in Moodle, i.e., quizzes where students can make multiple attempts to answer a question, with hints to help. It presumes a familiarity with the Quiz function in Moodle. The examples shown below were from a Multiple Choice quiz.

Individual Question Settings

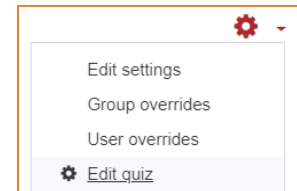

Click on **Edit Quiz**, and go to **Add Question** found on the right side pull-down menu.

If you have started a quiz and wish to go back to it to add a question, access it by clicking on the quiz name, and then go the **Settings button**. Click on **Edit Quiz** in the dropdown menu and then go to **Add Question**.

Settings under Adding a Question

Choose the type of question. Add your question text. Decide how many marks the question is worth and how many correct answers there will be.

General

Category: Default for Example Course 101 (1)

Question name: M1 Choose the correct response

Question text: Choose the correct response.

Default mark: 1

One or multiple answers?: One answer only

☒ Shuffle the choices?

Number the choices?: a., b., c., ...

Next, set up your choices.

For each choice, you can provide some feedback. This feedback is the same as the "specific feedback" in the Review Options for the General Quiz settings (see page 1).

Feedback can encompass encouragement, an explanation about why the answer is incorrect, or a hint about what the correct answer might be.

Obviously, be sure to include at least one correct answer. Remember to set the grade for this answer to **100%**.

You may also add **Combined feedback**.

Answers

Choice 1

Wrong answer 1

Grade: None

Feedback: Close, but no cigar.

Choice 2

Wrong answer 2

Grade: None

Feedback: No. Check the spelling.

Choice 3

Right answer

Grade: 100%

Feedback: Yes! Well done!

Combined feedback

For any correct response

Your answer is correct.

For any partially correct response

Your answer is partially correct.

Options

☒ Show the number of correct responses once the question has finished

For any incorrect response

Your answer is incorrect.

After the fields for the Choices are completed, scroll down until you reach “Settings for **Multiple Tries**”. If you want incorrect attempts to be penalized, set that penalty here. If no penalty, set to 0%

Multiple tries

Then add text to the **Hints**.

* Important: Hints are required to enable multiple attempts at a question. If there is no text in the Hints box, students will not have the chance to retry a question, even if all the other settings are correct.

Due to the way that Moodle quizzes are set up, I recommend adding a phrase such as “Click below to try again” so that it’s clear to students how they can try answering the question again.

Hint 1

Check the punctuation and the spelling. Click below to try again.

Hint 1 options ☐ Options *Clear incorrect responses* ☐ Show the number of correct responses

Hint 2

Hint 2 options ☐ Options *Clear incorrect responses* ☐ Show the number of correct responses

Save your changes. This will then take you back to the Edit Quiz page.

Settings under Question Preview

In the "Edit Quiz Page", you will see a list of your active quiz questions. For each question, click on the magnifying glass, which takes you a preview of that question.

The screenshot shows the 'Edit Quiz Page' interface. It lists three questions across three pages. Each question row includes a magnifying glass icon for previewing the question. An orange arrow points to the magnifying glass icon on the first question, 'M1 Famous Psychologist Freud'.

A preview screen displaying the question should pop up. Make sure the question has the following options. Specifically, under **Display Options**, set "Right Answer" to "Shown".

The block contains two screenshots. The left screenshot shows the 'Display options' settings for a question. The right screenshot shows the question preview for 'Question 1'.

The Preview Question option allows you to check whether an individual question functions as you want it to. You can also adjust the attempt and display options and start the preview again with the new settings.

An incorrect response should look like this:

Question 1

Tries remaining: 2

Marked out of 1.00

Choose the correct response.

Select one:

☐ a. Wrong answer 1

☒ b. Wrong answer 2 **No. Check the spelling.**

☐ c. Right answer

Your answer is incorrect.

Check the punctuation and the spelling. Click below to try again.

Question 1

Incorrect

Marked out of 1.00

Choose the correct response.

Select one:

☐ a. Right answer

☐ b. Wrong answer 2

☒ c. Wrong answer 1 **✖ Close, but no cigar.**

Your answer is incorrect.

The correct answer is: Right answer

This is what a series of incorrect responses with a response history looks like:

Choose the correct response.

Select one:

☒ a. Wrong answer 2

☐ b. Right answer

☐ c. Wrong answer 1

4	9/01/19, 13:53	Submit: Wrong answer 2	Tries remaining: 1
5	9/01/19, 13:54	Try again	Tries remaining: 1

In this example, only two hints were set. This means that students are allowed only two attempts at the question before you gives you the right answer. To add more attempts at this question, add another hint in the Question Settings.

Choose the correct response.

Select one:

- ☐ a. Right answer
- ☒ b. Wrong answer 1 ✖ Close, but no cigar.
- ☐ c. Wrong answer 2

Your answer is incorrect.

The correct answer is: Right answer

This is what students see after exhausting the number of allowed incorrect responses. Notice that the correct response is provided:
