

User Overrides

User override is an important feature of Moodle tests. Students may need test accommodations to meet their learning needs or occasionally events in students' lives require instructors to modify test parameters. When you need to modify a test for students, you may use user overrides so selected students may have extra time to write the test (or no time limit), a different date to write the test or may have extra attempts to write the test.

Contents

- How to set user overrides
 - Step One: Select test
 - Step Two: Locate the User Override
 - Step Three: Adjust the Student User Override

How to set User Overrides for a student.

The following instructions should be used to assist students when students are in need of accommodations. It is important practice to ask students to check the test settings prior to entering the quiz to ensure they are correct. Test parameters are visible to the student prior to initiating starting a test. Once they start a test, it is too late to change the timing for their test attempt. You may do a user override to allow the student to begin another attempt, but this causes unnecessary stress on the student.

Start attempt

Password

To attempt this quiz you need to know the quiz password

Quiz password

Timed quiz

The quiz has a time limit of 15 mins. Time will count down from the moment you start your attempt and you must submit before it expires. Are you sure that you wish to start now?

Start attempt

Cancel

Test settings are visible to the student prior to them initiating the **Start attempt.**

Step One: Select the test that requires a user override.

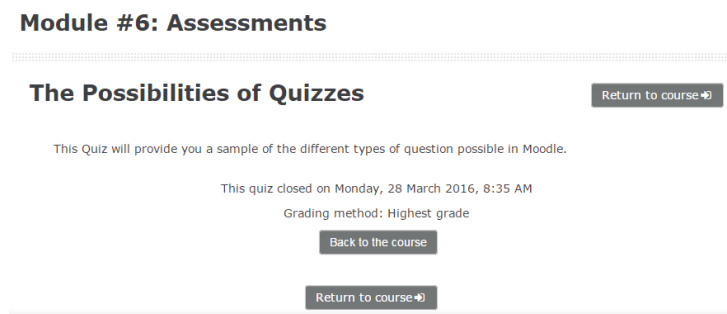

1. Log into Moodle.
2. Select the course that has a test that requires a user override.
3. Click on the test the student needs to take.

The Possibilities of Quizzes

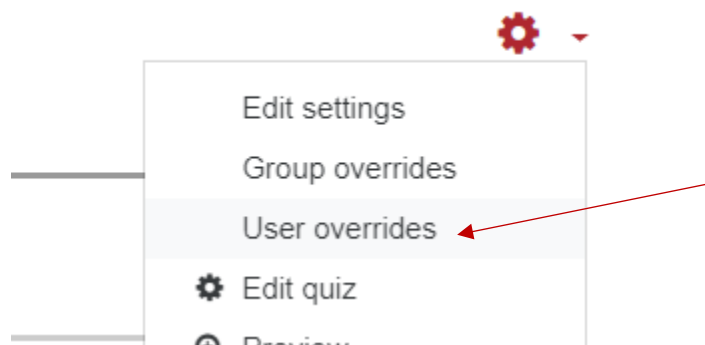

Hint: Look for the test icon!

4. You will see the Test Instructions.

Step 2: Locate User overrides.

After you have clicked on the test or quiz, look within the **Settings button** dropdown menu. In computer lingo, we say the **Settings button** is intuitive; it changes depending upon where you are in Moodle. When you are in a test, items listed in this menu pertain to the test. Select **User Overrides**. [Note: If you go into the Edit settings you are adjusting the test settings for the entire class.]

Step 3: Adjust Student User Overrides:

1. Add User Override

Once you have selected **User Overrides**, the following will appear on your screen.
Click on **Add User Override**.

Example Quiz

Add user override

The following will appear:

Example Quiz

▼ **Override**

Override user ! No selection

Search Search box for students (click for list)

Require password ? Password

Open the quiz 8 January 2019 14 51 Enable

Close the quiz 10 January 2019 14 51 Enable

Time limit ? 15 minutes Enable Time Limit

Attempts allowed ? Unlimited Quiz Dates and number of attempts

Revert to quiz defaults

Save Save and enter another override Cancel

2. Locate the student's name in the User Override area

Find the student from the list or do a search. See below three different instances of student searches using a student's first name, last name or parts of their name. Ensure the sequence of letters are correct.

Override user* Search

tststu one_JW
tststu two_JW

You will not have to type out the entire student name.

Override user* Search

tststu one_JW

You can use the first name or the last name or parts of the name... but make sure you have the correct letter sequence.

Override user* Search

Melanie Mattila

3. Select the student.

Override user ! **No selection**

Require password ?

Open the quiz

Search

NQC Test1, nqctest1@gmail.com

NQC Test2, nqctest2@gmail.com

4. Adjusting the Test Settings for a Student

There are two predominant testing issues you typically address through User Overrides.

You may need to:

- Open the test because the student is writing the test at a different time.
- Adjust the length of time a student has to complete the test.

How to open the quiz for students. If the dates and time are not in the range as set for the remainder of the class, click on the **Enable** button on the far right and adjust the dates using the drop down button.

Open the quiz

10 January 2019 14 00 ☒ Enable

Close the quiz

10 January 2019 15 30 ☒ Enable

Remember you are adjusting the quiz/test for the selected student.

If you are opening a quiz for a student for immediate use you only need to adjust the **Open the quiz** settings. It is best to use the **Time limit** rather than the **Close the Quiz** feature. See below for details.

Moodle intuitively puts a time approximate to the time you are working on the User Override to **Open the Quiz**. This version of the cheat sheet was worked on January 9, 2019.

10 ▾	January ▾	2019 ▾	15 ▾	06 ▾		☒ Enable
10 ▾	January ▾	2019 ▾	15 ▾	30 ▾		☐ Enable

Adjusting the time allowed to write the test. The best practice is to use the **Time Limit** rather than using the finite **Close the quiz**. If the student begins their test late due to password issues or not being able to login, etc., it will not penalize the student. Moodle will start the clock when they begin the test.

Note: Remember to use the drop down menu to select the appropriate time unit.

15	minutes ▾	☒
Unlimited ▾	weeks days hours minutes seconds	
Revert to qu		

Password

If a password is used for the quiz, the **Quiz Password** text box will be displayed when a student enters the quiz.

If a student does not have the correct password, use the **Unmask (magnifying glass)** to identify the required password.

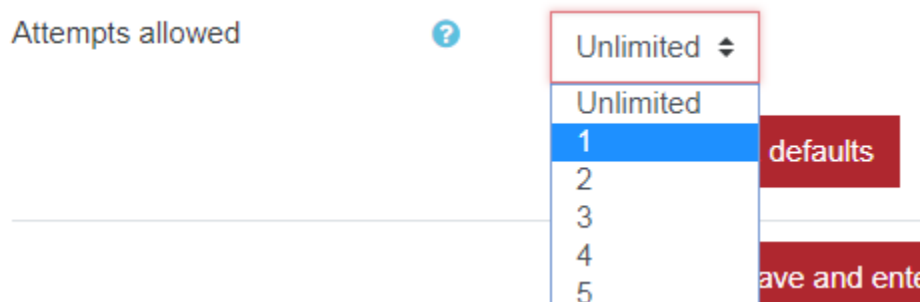

If you enter user overrides with test accommodations in which the test remains open for the student prior to the test start time, you may choose to enter a new password to ensure test security. Note: *If you change a password here, it only changes the password for this particular student and not the entire class. If the student attempts to use a password given to them by their instructor, it will not work.*

Make the password easy to enter. (Example: 555Math)

Attempts Allowed

For most summative tests, there should only be an opportunity to complete the test once. In most cases you should ignore the **Attempts Allowed** feature. However, if an emergency arises, (student accidentally submits test), go back into the **User override** for the student and change the **Attempts Allowed** to two attempts.

5. Save User Override, Revert to Quiz Defaults

Remember to **Save, Save, Save!**

If you have multiple students with different overrides writing the same test, you may **Save and enter another user override**.

If you have chosen the wrong student or want to revert back to the original parameters, you may **Revert to quiz defaults**.

Revert to quiz defaults

Save
Save and enter another override
Cancel

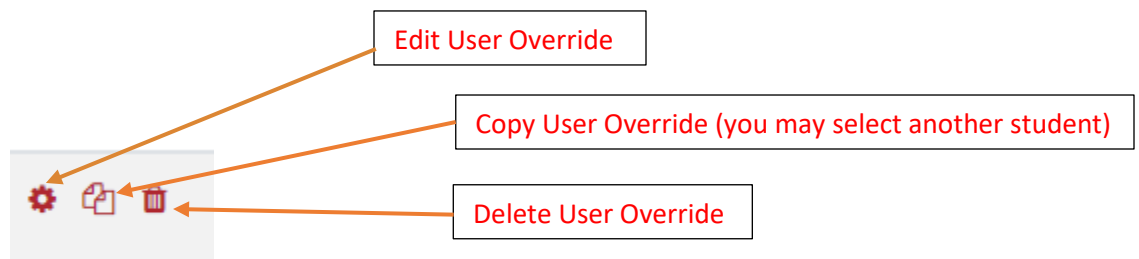

6. Double check the Overrides you have created for student(s).

Once **Save** is selected, you are shown the revisions you have made.

If you made a mistake, remember you may return to the **User override window**. Click on the **gear** under Action across from the student's name. To delete, use the **Garbage** can icon. To copy a user override, use the **duplicate** (pages) icon.

Example Quiz

User	Overrides	Action
NQC Test1	Quiz opens	Thursday, 10 January 2019, 3:06 PM
	Quiz closes	No close date
	Time limit	30 mins
	Attempts	1
