

Resources: URL

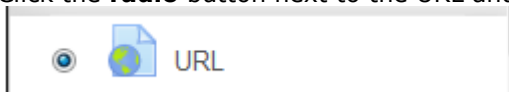

A URL is a link on the Internet to a website or an online file. Instructors may use the URL to provide their students with web links for research, saving the student time and effort in manually typing out the address. One may also use URLs to link to interactive resources and videos.

☐ Display description on course page 

4. Type or paste a copied web address in the "**External URL**" box.
5. Type a **Name** and **Description** (optional). The **Name** will be the title given to the activity on the Moodle course page. For easy student navigation, choose a **Name** that is specific and clear as to what the resource is. The **Description** is for your reference unless you check the box below the Description: **Display description on course page**. Only choose this option if it is necessary. This clutters the home page of your course.
