

### Navigating Moodle

There are 2 ways to move to the different parts of Moodle.

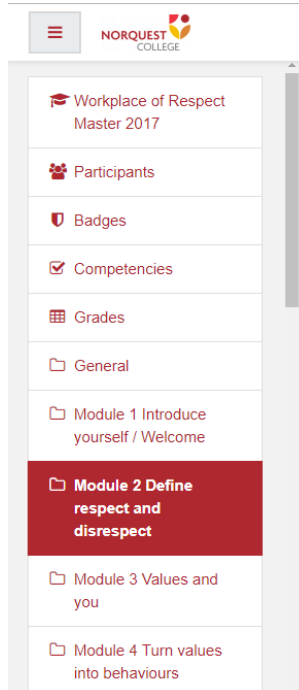

#### 1. Breadcrumbs

One method to navigate within Moodle is to use "Breadcrumbs". Breadcrumbs are at the top of every page and tell you where you are in a course, and how you got there. For example:

#### 2. Navigation Pane

You can also navigate within Moodle by using the Navigation Pane on the left side of the screen. Open it by clicking the hamburger button (top left):

# Dashboard

Once you have logged in, you will be directed to your dashboard.

The screenshot shows the Moodle dashboard for a user named Melanie Mattila. At the top, there is a navigation bar with links to Library, MyQuest, MyMail, and Technical Support. The user's name and profile picture are displayed in the top right corner. On the left, a sidebar contains a 'Dashboard' menu with links to Calendar, Private files, My courses, New Moodle Demo 1, and several course listings. The main content area is titled 'Course overview' and features tabs for Timeline and Courses. Below these tabs, there are two course cards: 'New Moodle Platform Demo Course 1' with a 0% progress indicator, and 'SCN-2231-Biology 20-O02-2019 Wtr'. On the right, an 'Upcoming events' section lists three assignments with their due dates and times.

**Links** - Library, MyQuest, MyMail and Technical Support links are found along the top of the screen.

**Course Overview** – This block shows a list of all your available Moodle courses.

**Navigation Pane** – This pane includes quick links to your home page, and your courses.
